

Outdoor Education, Visits and Off-Site Activities Health and Safety Policy

Devon County Council and
Torbay Council establishments

January 2008

Foreword

'Outdoor learning engages young people directly with the world beyond the classroom, enriching and extending the ways in which they learn, increasing their knowledge and their understanding. It provides powerful opportunities for young people to develop confidence, to learn to live and work with others and respond to challenges. As a consequence, young people are more physically active, are better able to recognise and manage risk, stay safe, adapt to changing conditions, solve problems and become increasingly independent.

Outdoor learning gives meaning to sustainability and how young people interact with their environment and the world beyond the classroom. It may involve the excitement or challenge of a journey, investigating the coast, visiting a historic site, farm or art gallery, taking part in a short stay residential on Dartmoor, exploring the immediate neighbourhood or taking part in an extended expedition. It contributes significantly to each of the five outcomes within the Every Child Matters framework and is an essential feature of the development of all young people throughout their education.'

Changing Our Futures, Devon County Council, 2007

The statements above capture the spirit and value of outdoor learning. This policy document seeks to ensure that all young people continue to benefit from opportunities to take part in safe, well managed visits and off-site activities. The responsibilities on all of us are considerable, but so are the rewards for young people. Children in their early years should have daily access to the outdoors. The government has expressed its commitment to learning outside the classroom in the recently launched manifesto. We also have obligations to secure positive leisure time activities for young people.

The comprehensive guidance detailed in this document is designed to support everyone who is involved in the planning, management and delivery of visits and off-site activities, incorporating outdoor learning in its widest sense, and to do so in ways which reflect current good practice and our duty of care.

Anne Whiteley

Director of Children & Young People's Services,
Devon County Council

Margaret Dennison

Strategic Director, Children's Services,
Torbay Council

Summary

Devon County Council and Torbay Council recognise the significant contribution educational visits and off-site activities make to the development of young people and to the achievement of each of the five outcomes of Every Child Matters. Indeed, The Education and Inspections Act 2006 introduces a new duty on local authorities to secure access for young people in their area to sufficient positive leisure-time activities: things to do, places to go.

This document details the procedures that establishments must follow to comply with the health and safety policy of each Council. It is intended to support you and help ensure that all visits are organised with due care and reference to the safety of all.

A web based visit notification and management system called **Evolve** is being put in place across all establishments to help secure effective arrangements for communication and management. Establishments will have a log-in to the site via the head and the educational visits co-ordinator (EVC). Other members of staff should contact their head or EVC for access to the site. During spring and summer 2008, arrangements will be introduced for processing and approving all educational visits and off-site activities through Evolve. Evolve also contains a data base with search facilities, a reports section and ready access to other guidance documentation, resources and training provision.

Find Evolve at www.devonvisits.org.uk Details about Evolve are available from the Outdoor Education Team, Devon Education Services, phone 01392 384846, email: outdoor.education@devon.gov.uk

While certain tasks may be delegated to establishments the local authority, where it is the employer, retains ultimate responsibility. This is in accordance with Department for Children, Schools and Families (DCSF) statutory guidance; Health and Safety: Responsibilities and Powers, 2001. www.teachernet.gov.uk/visits

All establishments should develop their own educational visits policy. A model policy is available at: www.deseducation.org/outdooreducation Click on the policies and guidance section.

Supplementary information about this guidance will be put on the Devon Education Services web site and cross referenced through Evolve. The web version of this document will be updated on an annual basis, to reflect current good practice.

The arrangement between Devon County Council and Torbay Council to provide advice and support for health and safety for education visits and off-site activities is summarised at: www.torbay.gov.uk/index/education/out-of-school-activities/educationalvisits.htm

Find more information and a pdf version of this booklet at:
www.deseducation.org/outdoorededucation or contact:
The Adviser for Outdoor Education, Devon Education Services,
Great Moor House, Bittern Road, Sowton, Exeter, Ex2 7NL.
Phone: 01392 384846 Fax: 01392 384880
Email: **outdoor.education@devon.gov.uk**

All Devon and Torbay secondary schools will get three hard copies of this booklet.
All other establishments will get two copies.

If you need more hard copies contact:
Devon Education Services (Publications)
Great Moor House, Bittern Road,
Sowton, Exeter EX2 7NL

Phone: 01392 384839
Fax: 01392 384880

Cost £12 each

The forms at the back of this booklet are recommended examples to help you plan and manage off-site activities. You may wish to amend or adapt forms for your own purposes; such as Form SOE1, and produce alternative forms for easily managed or complex activities; such as Form SOE3 for parental consent. Evolve allows forms to be completed and stored on line.

Planning checklist for visits and off-site activities

This checklist provides a summary of the main points which should be considered by the party leader when planning a visit off-site. The checklist may be used as an aide-memoire by the party leader or may be a formal record for the head or governing body. It may therefore be used by the head to decide whether to give approval for a visit.

The checklist is designed to help the head, EVC and the party leader ensure:

- the health, safety and well being of young people and staff, including volunteers
- young people gain the maximum educational benefit from the visit or activity
- effective management, planning, organisation and leadership
- compliance with policies and statutory requirements.

1. Party leader (see Section 2.1)

- Is there a clearly identified party leader, sufficiently experienced and competent to assess the risks and manage the proposed visit or activity?

2. Purpose (see Section 1.1)

- Is there a clearly identified purpose for the whole programme and any of its constituent parts, appropriate to the age and ability of the group?

3. Risk assessment (see Section 2.4)

- Has the party leader assessed the risks involved in all aspects of the visit or activity and recorded the significant findings, or made reference to a previous record, with amendments as necessary? See Form SOE6 and generic risk assessments at www.deseducation.org/outdooreducation
- Are the staff involved in the visit sufficiently able and experienced to re-assess risks on an on-going basis throughout the programme?

4. Preliminary visit

- Has the party leader made a preliminary visit to the site or centre to be visited, to check arrangements? These include; travel time, access and permission, facilities and equipment, leisure or recreational facilities for residential stays, staff support, guides or programmes of work, potential health and safety issues, shelter, toilets, costs, accommodation, contingency arrangements, references from previous users.
- If no pre-visit has been carried out, has action been taken to ensure the party leader is aware of potential hazards and opportunities?

5. Location

- Is the proposed location of the visit suitable for the activity being done and appropriate for the group?

6. Advice

- Has advice been sought from someone with expertise or technical competence where there is uncertainty about safe practice? This may be the EVC, an external technical expert, or the adviser for outdoor education.

7. Approval (see Section 2.5)

- All visits must be approved by the head or the EVC acting on behalf of the head.
- Does the proposed activity involve:
 adventurous activities (category B) or
 a visit abroad (category C)?
- If so, in addition to approval from the head the visit may also need to be approved by the adviser for outdoor education.

8. Venue

- Does the visit involve adventurous activities booked through a commercial, charitable or private provider? If so, see Section 4.6. You may need to forward a copy of Form SOE5 in Section 5 to the provider to confirm that they meet expected standards.

9. Staff (see Section 3 and Section 4)

- Are members of staff, including volunteers, suitably competent – experienced, qualified and able – to supervise the individuals and groups they are responsible for, in that environment?
- Are members of staff, instructors or volunteers leading adventurous activities suitably competent to do so?
- Do members of staff have sufficient knowledge of young people for who they are responsible?
- Have members of staff or adult volunteers been CRB checked, where necessary? (see Section 3.3)

10. Staff to young people ratio (see Section 3.1)

- Will the group have the acceptable staff to young people ratio necessary for the activities proposed?
- Do plans and staffing ratios reflect the needs of anyone with a disability or needing extra support?
- Does staffing include male and female supervision, where necessary?

11. Parental and guardian consent (see Section 3.8 and Form SOE3)

- Have parents and guardians given their informed consent for the visit as a whole and for any adventurous activities which are planned?

12. The programme

- Do young people and staff have the appropriate clothing and equipment necessary for the activities proposed, allowing for a range of weather conditions?
- If not, will an external provider be offering appropriate equipment?
- Are the young people prepared for and physically capable of taking part in the proposed activity?
- Is the programme suitable for all of the participants?
- Is there an alternative programme (a plan B) in the event of poor weather, or other necessary change and have the risks related to plan B been considered?
- Does the programme reflect a responsible attitude towards the environment?

13. Organisation (see Section 3)

- Are staff aware of dietary and medical needs of young people and staff?
- Have suitable and sufficient arrangements been made for first aid? (see Section 3.2)

14. Transport (see Section 3.5)

- Is appropriate and legal transport available?
- Are there suitable and sufficient qualified and CRB checked drivers for any planned minibus journey?
- Will departure and return times be made known to staff, young people and parents?
- Is there a contingency plan in the event of a delay or early return?

15. Insurance and finance (see Section 3.4 and Section 3.6)

- Is there adequate and suitable insurance cover? (see Section 3.4)
- Have arrangements been made to finance the visit and manage the associated funds? (see Section 3.6)

16. Briefing for young people

- Will the young people be properly briefed on the activities they will do during the visit?
- The briefing may need to include:
 - appropriate clothing and equipment
 - rendezvous procedures

safety risks of jewellery
groupings for study or supervision
a system of recall and action in emergencies
agreed codes of conduct and behaviour
significant hazards, including water
relevance to prior and future learning

17. Briefing for staff

- Will the party leader also brief adults and voluntary helpers?
- The briefing may need to include:
 - anticipation of hazards and the nature of the programme
 - defining roles and responsibilities of staff
 - careful supervision to cover the whole time away
 - arrangements for any indirect supervision where applicable
 - standards of behaviour expected from young people
 - regular counting of participants
 - how much help to give to young people in their tasks
 - a list of names of people in sub groups
 - emergency procedures

18. Emergency procedures (see Section 3.9)

- Has a named emergency contact been identified at home or at base in the event of an emergency, who has a contact list of the group members including staff and a programme of the group's activities? For out of work hours, two emergency contacts should be identified.
- Are the staff sufficiently aware of emergency and accident procedures and do they have access to relevant emergency and group home contact numbers?

19. Preparation and communication

- Is there adequate time and opportunity to prepare for the visit or activity?
- Have other staff and colleagues whose work may be affected been notified of planned arrangements?

20. Follow up

- Have arrangements been considered for appropriate follow up work and evaluation after the visit?
- Has a report been provided for the head or other colleagues, where appropriate, to share outcomes arising from the visit and learn from problems or incidents?
- Have other records been completed, for example those related to vehicles or equipment?
- Have financial records been completed?

Section 1

Introduction

‘Every child and young person should have opportunities to experience the world outside the classroom and take part in residential programmes to stimulate, inspire and bring learning to life. This should be an integral part of their learning and development, complementing learning in the classroom.’

Changing Our Futures, Devon County Council, 2007

Note that Changing Our Futures includes a wide range of case studies which illustrate how outdoor learning can be applied to the five outcomes of Every Child Matters. Find a copy of the document at: www.deseducation.org/outdooreducation

1.1 The value of outdoor education

Outdoor education contributes significantly to the five outcomes of Every Child Matters and helps young people to:

- acquire skills which promote well-being and healthy lifestyles into adulthood
- develop knowledge and understanding about risks to promote their own and others’ safety
- enjoy and achieve as a result of opportunities to develop as successful and confident learners
- gain a heightened awareness of the local and global environment and our role within it
- gain and apply key skills including leadership, team working and decision making, so that they are better able to achieve economic wellbeing.

In November 2006 the DCSF launched a **Learning Outside the Classroom Manifesto** through which commitment by them and other bodies has been emphasised:

‘Every young person should experience the world beyond the classroom as an essential part of learning and personal development, whatever their age, ability or circumstances. Learning outside the classroom is about raising achievement through an organised, powerful approach to learning in which direct experience is of prime importance. This is not only about what we learn but importantly how and where we learn.’

Find more information at:

www.teachernet.gov.uk/teachingandlearning/resourcematerials/outsideclassroom/s
[ummary/](http://www.teachernet.gov.uk/teachingandlearning/resourcematerials/outsideclassroom/s)

www.everychildmatters.gov.uk/youthmatters/thingstodo/

1.2 Equal Opportunities

Outdoor education, visits and off-site activities should be available and accessible to all who wish to participate, irrespective of gender, religion, ethnic origin, social background, medical need or physical ability. All young people should be encouraged to participate in as wide a variety of visits and activities as possible.

Planning for visits and activities must take account of the Special Educational Needs (SEN) and Disability Act, 2001 and The Disability Discrimination Act 2005. Schools should seek to anticipate the needs of pupils who are disabled as well as the needs of specific pupils. Specifically, schools must not:

- treat a disabled pupil or prospective pupil less favourably than another for a reason related to their disability and without justification
- fail, without justification, to take reasonable steps to avoid placing disabled pupils at a substantial disadvantage in comparison with their non-disabled peers.

In essence disability legislation requires schools to:

- plan ahead to meet the needs of all disabled pupils
- identify potential barriers to inclusion
- work collaboratively with disabled pupils, their parents and others
- identify practical solutions through a problem solving approach
- ensure that staff have the necessary skills to respond effectively
- monitor the effects of adjustments on a pupil's progress.

Find more information about **The Disability Discrimination Act 2005** and implications for managing educational visits and off-site activities at:
www.deseducation.org/outdooreducation Click on supplementary guidance.

Find more information from DCSF about promoting the welfare and interests of disabled children at: www.teachernet.gov.uk/wholeschool/sen/

1.3 The legal framework

Responsibility for health and safety is shared between the parties involved in managing any programme of work or activity. The level of responsibility relates to the level of control. However, ultimate responsibility rests with the employer. In the case of schools, who the employer is varies:

- For community schools, community special schools, maintained nursery schools and pupil referral units the employer is the local authority.
- For foundation schools, foundation special schools and voluntary aided schools the employer is usually the governing body. This is also the case with Trust Schools.

The local authority is the employer for statutory youth groups.

1.31 *The 1974 Health and Safety at Work Act*

The 1974 Health and Safety at Work Act requires employers to do all that is reasonably practicable to ensure the health, safety and well being at work of employees and non-employees, including young people, who are affected by their work. This includes off-site activities.

The 1974 Act and associated regulations including The Management of Health and Safety at Work Regulations 1999 require that employers:

- produce a health and safety policy linked to risk assessment
- have in place systems for reporting accidents and incidents
- produce and implement risk assessments
- develop measures to control those risks including training and providing information
- appoint people competent to carry out specific tasks
- develop emergency procedures
- monitor and review procedures and practice.

This policy document summarises the procedures which should be followed by council employees in managing outdoor education, visits and off-site activities.

Under the same legislation employees, including volunteers, should:

- take reasonable care of their own and others' health and safety
- co-operate with their employer over safety matters
- carry out activities in accordance with training and instruction
- inform the head, manager or party leader of any serious risks.

1.32 Common law

Common law expects people acting "in loco parentis" to take the same care as a reasonable and careful parent would. This duty is continuous during any visit or off-site activity and cannot be delegated. The principle of being in loco parentis applies to all young people under the age of 18 so parental consent is needed for people under that age.

There is also a higher duty of care on teachers and other professional staff because of the role they carry out and the greater knowledge they are assumed to have of young people and specialised activities. The level of judgement expected of staff is related to that individual's knowledge, experience and training.

Common law indicates that the age of the young person and the nature and location of the activity are factors in determining the degree of supervision required. Staff should consider the known patterns of behaviour of particular pupils or young people. Any action should be in line with developed and accepted practice.

1.4 The scope of the policy

This booklet applies to staff and volunteers working in all Devon County Council and Torbay Council establishments.

The policy also applies to non council establishments which are subject to council registration or inspection. These establishments are expected to work to equivalent standards to those outlined in this booklet.

We recommend that, in schools where the governing body is the employer, this policy is formally adopted and the same procedures are followed. If such schools do not use the council's policy and procedures they should ensure that equally robust systems are in place.

A model policy for managing outdoor education, visits and off-site activities at establishment level is available at: www.deseducation.org/outdooreducation
Click on *policies and guidance*.

This booklet applies to all aspects of outdoor education, visits and off-site activities. It includes activities which are overtly hazardous and those where the risk is small. It includes all elements of those programmes including the journey and any residential element.

Although the document has been produced to meet the needs of Children and Young People's Services the guidance should inform good practice for planning and provision for Adult and Community Services.

This policy will also apply to organisations which have formally subscribed and registered their participation in the use of the booklet and associated advice, information and training. Those in charge of young people or adults outside the direct responsibility of the local authority, including non-statutory youth groups and independent schools may also find this guidance useful.

1.5 Work experience

This policy does not cover work experience for which separate arrangements apply. Please note that school journey insurance cover for off-site activities does not apply to work experience. Devon and Torbay Councils have each sub-contracted procedures in connection with policy and guidance for work experience to the Devon Education Business Partnership (DEBP), now part of the Cornwall and Devon Careers Service. Each council, however, has ultimate responsibility for work experience done by school pupils.

For more information contact:

Devon: Geoff Hallett, Partnership Manager, Devon Education Business Partnership
Phone: 01392 215501 Email: geoff.hallett@careers-cd.org.uk

Torbay: The 14 -19 Team, Learning and Standards, Torbay Council
Phone: 01803 208965 through DEBP listed above.

1.6 Terminology

In this policy terminology has been adopted to incorporate the variety of people the booklet is for and the range of activities involved.

Council – This is a combined policy document so unless there is reference to one specific council in the text or the meaning needs additional emphasis, the term council relates to both Devon County Council and Torbay Council.

Local authority (LA) – This term applies to both Devon County Council and Torbay Council, unless there is specific reference to one local authority.

Governors – members of school and college governing bodies. It also includes members of management committees and other formally constituted groups which have delegated or devolved responsibility.

Head – the head teacher or principal of the establishment or the line manager the party leader is responsible to and whose approval is normally needed for an activity to go ahead.

Educational Visits Co-ordinator (EVC) – a member of staff carrying out specified functions on behalf of the head, principal or manager in order to assist with the planning and managing of educational visits and off-site activities.

Young people – the participants, pupils or group members the activities are provided for. They will normally be under the age of 18. The word pupil is used where the context is appropriate.

Parents – includes guardians or carers where these terms are more appropriate.

Party leader -the person who has overall responsibility to the head for the whole group. A number of group leaders may be answerable to the party leader.

Group leader – the person who is directly responsible for managing a group engaged in a particular activity, perhaps a teacher, youth worker or volunteer.

Instructor or Coach – the person responsibility may be delegated to for specialist instruction or supervision, because of their specific competence in an activity. The group leader or party leader has a responsibility to discuss any concerns they may have regarding safe practice with the instructor and, ultimately, to withdraw members of the group from that activity if they are not confident of the safety standards which are operating.

Off-site activities – This includes all aspects of outdoor learning, visits and residential experience which take place away from the school or normal working environment.

School – The school or establishment and which is typically responsible for the young people taking part in an activity and within which the party leader works.

For Duke of Edinburgh’s Award purposes:

- The **award officer** is the person designated by the operating authority to be responsible for all aspects of Award operation by and within the organisation.
- The **assessor** is an appropriately qualified, experienced or accredited individual, approved by the operating authority, who confirms whether participants have fulfilled the conditions and requirements of a particular section of the Award.
- The **leader** (or unit leader) is a person who co-ordinates, monitors and advises young people in their Award Group.
- The **supervisor** is responsible for supporting the participants in a particular section of the Award. In the expeditions section the supervisor is responsible to the operating authority for the safety and wellbeing of the young people during their practice and qualifying ventures. (See Section 4.9)

1.7 Guidance from the Department for Children, Schools and Families

The Department for Children, Schools and Families (DCSF) provides important guidance on the health and safety of pupils on educational visits. DCSF guidance has informed the development of this policy and further cross-references are made in this booklet.

For more information see:

- Health and Safety of Pupils on Educational Visits 1998, (HASPEV).
- Part 1 Supplement: Standards for LEAs in Overseeing Educational Visits, July 2002. This supplement sets out the functions of the educational visits co-ordinator in schools and the levels of risk management that local authorities and schools could use.
- Part 2 Supplement: Standards for Adventure, July 2002. This is aimed at the teacher or youth worker who leads young people on adventure activities.
- A Handbook for Group Leaders July 2002. This is aimed at anyone who leads groups of young people on any kind of educational visit. It sets out good practice in supervision, ongoing risk assessment and emergency procedures.
- Group Safety at Water Margins. This is aimed at anyone who organises learning activities that take place near or in water, such as a walk along a river bank or seashore, collecting samples from ponds or streams, or paddling or walking in gentle, shallow water.

Available at: www.teachernet.gov.uk/visits
or from DCSF Publications on: 0845 6022260.

Section 2

Planning and management

2.1 Roles and responsibilities

The local authority

The local authority will:

- make this policy document available to all establishments working within the LA, including schools, and to the Duke of Edinburgh's Award
- monitor and assess proposals for specified types of visit
- provide training related to managing off-site activities
- provide access to information and advice
- establish points of contact in the event of an emergency
- maintain specified insurance cover
- monitor and review safety for off-site activities.

The governing body - schools and colleges

The governing body should agree a policy for managing off-site activities. This may be done by endorsing the use of this policy. A model policy for governing bodies to use is available at: www.deseducation.org/outdooreducation

The governing body policy should include reference to school-based or local procedures for:

- approving off-site activities
- providing training and information
- managing any significant provision which is particular to the school such as a residential centre or minibus
- action in an emergency arising from visits and off-site activities
- reporting accidents and incidents
- monitoring and reviewing policy and practice.

It is recommended that:

- the head (or delegated senior member of staff such as the Educational Visits Co-ordinator) approves all off-site visits and activities
- the head provides a regular report to the Governing Body summarising the range of visits and off-site activities which have taken place.

The head

The head should ensure that planning and managing off-site activities complies with the policies of the LA and the school. Any significant variation between the LA policy and school procedures must be agreed by the governing body. The head may delegate this function to a senior member of staff acting as the EVC or keep the function personally.

However, responsibility in both cases rests with the head and with the governing body. The head should give particular attention to ensuring that:

- the party leader and additional staff are sufficiently experienced and competent to assess the risks and manage the visit or activity for the specific group they are responsible for
- risks have been assessed, appropriately recorded and safety measures put in place.
- procedures for approving off-site activities are followed.

For additional reassurance the head may ask the party leader to show that the planning checklist has been followed (see summary).

The educational visits co-ordinator

A school's EVC may be the head or a senior member of school staff appointed by the head and acting on their behalf. Overall responsibility rests with the head. The EVC should be specifically competent and trained for the task. The EVC should have practical experience in leading and managing a range of visits similar to those typically run by the establishment. Where this is not the case the head must reasonably limit the extent to which the function of the EVC is delegated. The EVC will be the principal contact with the LA over planned visits.

The EVC should work within the functions delegated by the head together with party leaders involved in visits and off-site activities and other staff to help ensure:

- educational visits follow the policies and procedures of the LA and the school
- the management of visits and off-site activities is informed by an appropriate risk assessment
- approval arrangements are satisfactory and based on safe practice and clear educational objectives
- staff have access to advice and information
- leaders and staff meet identified standards and are competent to lead and support particular visits and activities
- relevant training, induction and other Continuous Professional Development opportunities are provided
- procedures are in place to inform parents and for them to give consent
- emergency arrangements are in place for visits and off-site activities
- there is a system to keep and review records of visits, accident and incident reports
- systems are monitored and reviewed.

The EVC should seek to maintain opportunities for young people to engage in a wide range of safe, high quality visits and off-site activities through a clear and robust approach to managing health, safety and welfare.

The party leader

The party leader has overall responsibility for the supervision and conduct of the visit or activity and should be approved by the head or EVC acting on the head's behalf. In particular the party leader should:

- get approval from the head or EVC before any off-site visit or activity takes place.
- follow policy guidelines and regulations of the LA and the governing body
- assess the risks involved and amend any previously recorded risk assessment as appropriate

- consider the planning checklist in this booklet to ensure all procedures are being followed
- inform parents about the visit and gain their consent where appropriate
- reassess risks while the visit or activity takes place and act on that assessment.

Additional members of staff and volunteers

Members of staff, volunteers and parent helpers should:

- assist the party leader to ensure the health, safety and wellbeing of all young people and adults on the visit
- be clear about their roles and responsibilities while taking part in a visit or activity and carry out that role in an appropriate manner.

Young people

While taking part in off-site activities young people also have responsibilities which they should be made aware of by the party leader or other members of staff, for their educational development, their own health and safety and that of the group. Young people should be involved, at an appropriate level, in the planning and managing of visits and activities including risk assessment. Young people should:

- not take unnecessary risks
- follow instructions of the party leader and other members of staff
- behave sensibly, keeping to any agreed code of conduct
- inform a member of staff of significant hazards.

Parents

Parents have an important role in deciding whether any visit or off-site activity is suitable for their child. Parents should:

- inform the party leader about any relevant significant medical, psychological or physical condition
- provide an emergency contact number
- sign the consent form.

2.2 Competence to lead

The single most important factor in ensuring the safety of participants involved in a visit or activity is the competence of the party leader.

When assessing the competence of a member of staff to lead a visit the head or the EVC should consider these questions.

- What is the reason for the visit?
- Is the leader an employee of the LA?
- Does the leader have a sufficient understanding of their responsibilities?
- Does the leader have the necessary organising ability?
- Is the leader competent in risk assessment and risk management?
- Does the leader have suitable prior knowledge of the young people they will be responsible for?
- Does the leader have sufficient experience of leading similar visits?
- Does the leader have appropriate qualifications, is suitably up to date and fit to lead the programme?

2.3 Monitoring

The head and the EVC should ensure that there are suitable arrangements to monitor educational visits and off-site activities so that they have a sound picture of practice during those visits and activities. This may include:

- more detailed discussion with the party leader and other staff about proposed plans on a sample basis
- identifying a senior member of staff who may accompany visits on a sample basis to observe some or all of the provision, to help identify areas of good practice and areas for improvement
- reviewing the outcome of visits with the party leader to discuss outcomes and any incidents which may have occurred.

2.4 Risk assessment

The risk assessment of off-site visits and activities is simply:

- the careful identification of what could go wrong or cause harm during the visit
- making a judgement – assessing the risks – to see whether the planned precautions reduce the risk of significant harm to an acceptable level
- determining what else may need to be done if the risk has to be reduced further.

The risk assessment process forms the backbone of planning any educational visit. Risk assessment is a legal requirement. It is also a process that promotes good practice.

Every educational visit must be subjected to a risk assessment process. The complexity of the risk assessment, and the method of recording the risk assessment, will vary according to the nature of the visit. In every case, documentary evidence should exist to show that a proper assessment of the risks involved has been made and precautions identified to reduce the risks to an acceptable level.

A primary objective of most outdoor activities and educational visits is to enable young people to achieve realistic challenges and to give them the opportunity to take responsibility for themselves. Young people should be involved in the risk assessment and planning process. See www.deseducation.org/outdooreducation for more information.

Risk assessment for educational visits can be considered as having three levels:

1. Generic risk assessment

This is a statement of good practice that applies to the activity whenever and wherever it takes place. The assessment may take the form of local authority policies, national governing body guidelines for a particular activity, or the establishment's own policies and procedures. For information, see the generic risk assessments at: www.deseducation.org/outdooreducation

2. Event specific risk assessment

An event specific risk assessment should be completed by the party leader and is unique to each visit. It takes into account the site, individuals within the group and activity specific needs such as the environment, accommodation, travel and transport

and the leaders' expertise. It may include the supervision of young people when not engaged in activities led by an external provider. The event specific risk assessment may be an annotated or amended generic risk assessment. Sample risk assessments are included in this booklet.

The event specific risk assessment may simply be a reference to a generic risk assessment that has been modified. It may include a note of young people with special needs, or a particular issue relating to the venue being visited. It could be that a whole new risk assessment is needed, if the visit is unique or very unusual. It is desirable that establishments develop a paper or electronic file of event specific risk assessments that can be used each time that event takes place, with minor modifications if needed.

3. Ongoing or dynamic risk assessment

This involves professional judgements by all those involved in the visit in response to changing circumstances during the visit. The ongoing risk assessment monitors the control measures and adapts or confirms them as required. These ongoing decisions will determine the safety of the group and the success of the activity. It is not expected that leaders write down this ongoing risk assessment.

- Risk assessment is a legal requirement but it does not mean that you need to create lengthy and complex documents yourself. Most visits have been done before so use existing risk assessments as the basis for yours and modify or annotate as appropriate. Form SOE6 may be used or adapted for this task.
- You do not need to see the detailed risk assessment produced by an external provider if you are confident about the overall management of that provider. Form SOE5 helps you to confirm standards are appropriate. One significant exception to this concerns overseas expeditions, where it is recommended you look through the detailed risk assessment produced by the provider.

2.5 Approval procedures

All party leaders undertaking off-site activities with young people as part of their work with the local authority should follow the system of approval outlined below.

- For any off-site activity the approval of the head, or EVC as the delegated member of staff, is required. The establishment must keep a record of these visits and details may be requested by the LA as part of its statutory supporting and monitoring role. We recommend that these details are held on Evolve.
- Plans for activities in Categories B and C must also be approved by the adviser for outdoor education on behalf of the LA where the LA is the employer or where the governing body is the employer and formally adopts this policy. This ensures that suitable monitoring may take place and complies with the LA's insurance procedures.
- For the Duke of Edinburgh's Award Scheme in Devon there is a separate system of approval for activities which take place as part of the scheme, based on the same activity guidelines and regulations - see Section 4.9.
- All staff and volunteers who have regular or unsupervised access to young people must be CRB checked.

These arrangements also apply to the supervision of group members over the age of 18 where deemed appropriate by individual establishments.

There are three categories of activities and associated approval.

Category	Examples of programmes	Approval procedure
A	<p>Day visits not involving adventurous activities</p> <p>Residential visits not involving adventurous activities</p> <ul style="list-style-type: none"> <i>This includes; visits, journeys, sporting and physical education activities and environmental studies for which the element of risk is similar to that encountered in daily life. Examples include farm visits, forest schools, visits to sites of historic, commercial or cultural interest, most fieldwork, leisure centre visits, ice skating, local walks, journeys to the zoo or theatre.</i> 	<ul style="list-style-type: none"> Approved by the head or delegated to EVC
A	<p>Use of outdoor and residential centres managed by Devon County Council such as Haven Banks, Pixies Holt, Dartmoor Training Centre, Start Bay Centre, Wembworthy Centre and Grenville House, Brixham.</p>	<ul style="list-style-type: none"> Approved by the head or delegated to EVC
A	<p>Physical education and activities provided as part of PE lessons.</p>	<ul style="list-style-type: none"> Approval by the head or EVC
B	<p>Adventurous activities - residential or non-residential</p> <ul style="list-style-type: none"> <i>Outdoor and adventurous activities including those listed below</i> 	<ul style="list-style-type: none"> Approved by the head or delegated to EVC <p>and</p> <ul style="list-style-type: none"> Approved by the adviser for outdoor education on behalf of the LA
C	<p>Overseas and other provision</p> <ul style="list-style-type: none"> <i>All visits abroad.</i> <i>Activities in the air – except commercial flying</i> <i>Any other activity or programme where there is significant concern about safe practice.</i> 	<ul style="list-style-type: none"> Approved by the head or delegated to EVC <p>and</p> <ul style="list-style-type: none"> Approved by the adviser for outdoor education on behalf of the LA.

Where the governing body is the employer, the governing body must decide whether the council's policies and procedures will be followed or must ensure equally robust alternative arrangements are in place.

Local authority approval

Where LA approval of plans is required, details should be provided to the adviser for outdoor education:

- at the planning stage for overseas expeditions, before a contract is agreed with any external company
- three months or more in advance for visits abroad
- two months or more in advance for residential visits which involve adventurous activities
- at least two weeks in advance for non-residential adventurous activities.

Category B

- Category B activities may take place in hazardous or remote environments and require specific skills, experience and safeguards in order to contain risk at an acceptable level. Approval will normally only be given where activity leaders are appropriately qualified and experienced. In addition to technical competence, recognised by qualification, the head should be satisfied that the individual has adequate non-technical skills and judgement to supervise or manage the group in question.

Category B activities include:

Land based	Water based
Camping more than 30 minutes away from shelter or habitation	Canoeing or kayaking
Caving	Coastal and off-shore cruising
Cycling more than 30 minutes away from shelter or habitation (walking distance)	Power boating
Horse riding or pony trekking where a riding school or trekking centre is not used	Sailing
Mountain and moorland activities more than 30 minutes away from shelter or habitation	Sea fishing from a boat
Rock climbing, including abseiling, on natural crags or using climbing walls which are not on school sites	Snorkelling and sub aqua in the sea or open water
Gorge walking, coasteering or similar combined water and rock activities	Surfing
Snow sports in UK resorts - not including dry slope skiing	Water skiing

See the information on adventurous activities in Section 4.7

2.6 Evolve

A web based notification system, Evolve, is being introduced across all schools and other establishments from January 2008. Training will be provided for EVCs. This will enable schools more easily to:

- share information within the establishment
- share information with the LA
- learn from other schools' use of external providers
- build a record of visits and activities carried out each year
- reduce paperwork
- simplify and speed up approval processes
- assist record keeping
- manage health and safety requirements in this area.

We intend that schools and other establishments will be given additional delegated responsibilities for approving visits and activities in Categories B and C in due course. This would apply to schools and establishments which have well-established procedures working through a named EVC and using Evolve for all visits and off-site activities.

Find more information at: www.devonvisits.org.uk

Section 3

Organisation

3.1 Supervision

There are many variables which govern appropriate staffing ratios. The following ratios apply to supervising young people under the age of 18 and should be seen as minimum figures. They should not normally be exceeded except where examples are specified. The critical factors are to ensure there is an appropriate level of supervision, informed by risk assessment of the individual visit, taking account of the special needs of any individual young person. (Also see 2.5 - Approval procedures.)

Category A:

A minimum ratio of 1 adult to 15 group members is recommended, unless the group members are under the age of 8, in which case a minimum ratio of 1:6 is recommended.

There may be occasions, particularly in the use of school transport, journeys between school sites or in the neighbourhood of the school, where the above ratio may reasonably be increased as decided by individual heads, based on an assessment of risk.

Category B:

Ratios are specified for particular activities in Section 4.

Experienced instructors may exceed the ratios laid down in light of their assessment of the risks in a specific situation. However, standard practice is as described.

For other non-specified activities guidance on ratios may be determined with the adviser for outdoor education but will generally not exceed 1 adult to 10 group members.

Category C:

1 adult to 10 group members is the recommended minimum staffing ratio for visits abroad, but with a minimum of two adults accompanying the group.

5 - 8 years old

In each of the above categories a minimum ratio of 1 adult to 6 group members is recommended for children between the ages of 5 and 8. This will need to be further adapted for children in the foundation stage or early years, informed by the factors listed below.

Early years – from 0 - 5 years old

For outings, the staffing ratio must be within that which is required in the school or setting and will typically need to be an improved ratio. For further information see Section 3.12 below and links to the Statutory Framework.

3.11 Improved staffing ratios

An improvement in the basic ratios and staffing outlined above should be informed by risk assessment and may be needed depending on:

- the sex, ages, attitudes, disability, behaviour and competence of the group members
- the extent to which people with special health needs or learning difficulties are included in the group
- the nature of any planned specialist activities
- the experience and expertise of the adults
- the duration and nature of the journey
- the need to maintain a complete programme of supervision
- the type of accommodation
- the competence of the staff -inexperienced staff should be counted as group members.

For all except very small groups, each party should be accompanied by at least one additional adult who is considered responsible by the party leader and the head. This is essential for all visits abroad where the party comprises young people under the age of 18. For any visit where the party splits into sub groups the party leader will need to consider whether two adults need to accompany each group.

3.12 Early Years (0-5 years)

There is an expectation in the Early Years Foundation Stage that all children have daily access to the outdoors. Teachers should therefore ensure that provision enables access to the outdoor environment, including use of the wider context in the local community. These activities and experiences will need to be planned in the same way as those offered in the classroom.

In accordance with the statutory framework, staffing arrangements for outings and visits off-site must be organised to ensure safety and meet the needs of the children. For each outing providers must carry out a risk assessment which includes an assessment of adult to child ratios. This assessment must take into account the nature of the outing. Information can be found in the Framework, Appendix 2. In general, the ratio for outings will be at least equivalent to the statutory ratio which applies to the school or early years setting and in most cases will require an improvement in those ratios.

For further information see:

The Early Years Foundation Stage Statutory Framework and Guidance at:
www.standards.dfes.gov.uk/primary/publications/foundation_stage/eyfs/

3.13 Special needs

For special needs groups a minimum ratio of 1 adult to 6 group members is recommended. There are many circumstances where young people with learning difficulties or physical needs will need this ratio to be improved. Where there are more than three group members with special needs the party should be accompanied by at least one

additional adult who is over the age of 18 and considered responsible by the party leader and the head.

The individual education plan (IEP) for each young person who has special needs will help to determine the degree of additional support they need for off-site activities. Young people with special needs, like all young people, should be encouraged to participate in as rich a variety of outdoor education as possible (see *Section 1.2*).

Outdoor education for people with special needs should take place with a closely defined purpose in mind. The party leader must have a knowledge of the physical, mental, sensory and behavioural needs of group members and of the implications of these for the activity. Parents should be consulted and kept informed.

When young people with special needs are working with external providers, for example at an outdoor centre:

- allow sufficient time for discussion and outlining procedures - activities may need to be explained one step at a time, making clear what is expected of participants
- the respective roles of the group leader and the instructor may need to be discussed prior to an activity
- external staff will need to be informed of the special needs of group members.
- a procedure with the instructor should be established for withdrawing any participant if needed
- close attention should be given to medical and dietary needs and any emergency medical procedure – a system of communication may need to be agreed between staff and participants
- refer to the guidelines for particular activities and recommended staffing ratios.

3.14 Support staff

Support staff play a vital role in off-site visits and activities. Such staff may include:

- teaching assistants and Higher Level Teaching assistants (HLTAs)
 - parent volunteers
 - a member of the governing body of the school
 - qualified coaches or instructors
 - students
 - volunteers
 - an external adult such as a youth affairs officer
-
- Teaching staff have prime responsibility for supervision on a visit. The party leader must always be a qualified teacher or youth worker. This also means that the party leader is responsible for the curriculum context the group are working in. The party leader will typically have knowledge, and can take proper account, of the needs of all group members taking part in the visit. However, a group leader may be a member of the non-teaching support staff.
 - Involvement of support staff can help to meet recommended staffing ratios, provided the responsibilities placed on support staff are appropriate
 - The extent of support staff involvement will depend on:
 - a risk assessment of the activity
 - the size and nature of the group
 - the location of the group in relation to the party leader

- the relationship of the support staff to the group and their knowledge of the group members
- the competence of the support staff in managing young people and expertise in specific activities including any relevant prior experience, training or qualifications they may hold.
- The party leader does not have to physically accompany all young people on a visit at all times. At the party leader's discretion the party may be divided into groups, with a group leader who has temporary charge of a group.
- Group leaders and other supervisors must be competent to exercise good on-going risk assessment and risk management. This should include an understanding of when to stop an activity where the educational benefits are outweighed by the risks, when to adopt a plan B, should conditions need it, and how to deal with an emergency.
- The party leader must properly brief all group leaders and other accompanying staff. This should include how to make contact with the party leader in an emergency.
- Support staff should not take on the duty of care for young people, or take responsibility for the overall planning and organisation of the programme. However, they should be involved in planning and organisation. The level of this involvement will depend on the qualifications, role and experience of the individual.
- For local, low-risk visits and activities involving one or more small groups of young people a teacher can remain in school but must be contactable by a group leader needing support and be free to respond to a request for assistance.
- Support staff must be CRB checked if they have regular or unsupervised contact with young people.

When support staff may act as a group leader

- Teaching assistants taking small groups of pupils to the library or local park.
- Teaching assistants working one to one with pupils with special needs.
- A teaching assistant supporting the programme during a residential visit.
- Parents providing transport to a local after school activity using their own vehicle.
- A qualified coach leading a specific outdoor activity.
- A member of staff from another agency working with individuals or small groups in alternative curriculum settings.
- A teaching assistant accompanying a group of pupils to a nearby further education college or sports centre.
- Staff at an outdoor centre leading a weekly non-residential programme.

3.15 Using qualified coaches

Volunteer and paid coaches, specialist field workers or instructors may support schools in a variety of off-site visits and activities. Typically a coach has a specific level of competence in managing and delivering an activity and this should be established before the coach leads or supervises the activity. For higher risk activities, including adventure activities such as climbing or watersports, it is essential that the coach holds a recognised award in that activity.

A coach may act as a group leader and work at some distance from the teacher. The teacher has overall responsibility for the group, but may delegate responsibility for the specialist, technical instruction during the activity.

The party leader should seek to evaluate the competence of the coach and their ability to work with the age, behaviour and ability of specific groups of young people. Where

possible, this should be through direct observation and regular, systematic monitoring and review. The level of direct supervision by the teacher, as party leader, may then vary according to the competence and level of responsibility given.

Find more information on how non-teaching support staff may be involved in managing and supervising off-site visits and activities at:

www.deseducation.org/outdooreducation Click on *Supplementary Guidance*.

3.16 Residential visits

Mixed parties engaged in visits and activities involving an overnight stay should be accompanied by at least one adult of each sex. In this case the responsible adult may be a parent or student over the age of 18, where they are acceptable to the party leader and CRB checked where appropriate. For primary aged pupils it may be acceptable for female teachers only to accompany mixed parties provided the head and staff involved are satisfied that it is an appropriate arrangement and parents are informed.

Greater flexibility for staffing smaller mixed groups may be exercised where all group members are over 16 years of age. In these circumstances the arrangement should be agreed by the head and parents should be informed.

3.17 Remote supervision

Young people must be supervised throughout all visits, even though at times they may be unaccompanied by a member of staff or other responsible adult. This is known as remote or indirect supervision. Outdoor education encourages young people to gain confidence in their own abilities and to work with others. Small group and independent work which is not under the direct supervision of a member of staff can be very beneficial for this. However, greater care is needed in managing activities which can be onerous and demanding and must be based on risk assessment. This will need to take account of factors such as prior knowledge of the individuals (including their maturity and levels of responsibility), the venue, the environmental conditions, the activity taking place, preparatory training, the competence of the supervising staff and emergency systems in place. The issue of personal security for young people is also important, of course, and consideration should be given to the need for appropriate supervision.

Where a programme takes place in the local area involving no unusual activity or risk it may be appropriate for a group of older students to operate in small sub-groups under the supervision of a single leader, for example in fieldwork in the local town. In this situation:

- agree arrangements with the head or EVC
- young people should work in groups in a prescribed area within easy reach of a point of contact with the group leader
- young people should not be asked to work alone - groups of three or four are more likely to be appropriate
- parents should be informed about arrangements.

For adventurous activities, in order to reach the stage of acting independently, young people must have acquired the necessary techniques with sufficient experience, confidence, physical ability and judgement to apply those skills effectively. The training given must be sound and thorough, with careful judgement being necessary before the leader can withdraw. Even then withdrawal from direct supervision should be a gradual and progressive process.

A staged progression may develop from:

- accompanying groups to
- shadowing groups to
- checking at various times and venues to
- occasional contact via pre-arranged locations and methods

The leader remains responsible for the group when its members are operating at a distance. Also see Ten Tors Section 4.7 and Duke of Edinburgh's Award Section 4.9

3.2 Health and first aid

First aid should form part of the risk assessment for off-site activities. This will help to determine first aid staffing and equipment.

One of the supervisory staff undertaking off-site activities should be a competent first aider. As a minimum, there must be an appointed person in charge of first aid arrangements. An appointed person is someone identified to:

- take charge when someone is injured or falls ill, including calling an ambulance, if required
- look after the first aid equipment.

Competence may be recognised by prior knowledge and experience, or preferably, as a result of formal training which may include an assessment. The level of staff competence required will depend on many factors including:

- the nature of the programme and whether it is residential
- whether the programme includes adventurous activities
- the number in the party
- the extent to which outside first aid assistance is available, such as at many residential centres
- the environment and particularly whether it is abroad or remote
- the health and medical needs of individual group members.

Leaders are encouraged to attend a course run by the Red Cross, St. John's Ambulance, or another HSE recognised training provider. Courses currently available include:

- Appointed Person and Emergency First Aid Course
- First Aid at Work (4 days)
- First Aid at Work (2 days refresher).

Devon Discovery provide First Aid and Emergency Care courses under the authority of Mountain Medicine, an HSE recognised provider. These courses are specifically geared towards the outdoor environment. For details phone: 01822 890761
email: devon.discovery@devon.gov.uk or visit: www.devon.gov.uk/devondiscovery

A valid first aid certificate is a pre-requisite for many outdoor leadership qualifications for example Mountain Leader Training England (MLTE), Royal Yachting Association (RYA), British Canoe Union (BCU) or South West Mountain and Moorland Leader Training Scheme (SWMMLTS).

Individual establishments may wish to arrange a first aid course tailored to their particular needs and are urged to contact one of the first aid organisations.

For further information on training contact: Health, Safety and Wellbeing, DCCS Building, Falcon Road, Sowton Industrial Estate, Exeter, Devon EX2 7LB. Phone: 01392 382027
Email: jenni.bowden@devon.gov.uk

Group leaders supervising water based activities should be competent in water rescue and life saving techniques, including cardio-pulmonary resuscitation (CPR). To supervise certain activities, including open water swimming, you will need the Bronze Medallion of the Royal Life Saving Society (RLSS).

3.21 First aid kit

For all activities and the associated journey an appropriate first aid kit should be available and its stocks regularly replenished. The party leader and other staff should be aware of its contents and know how they should be used. All staff should know how to contact the emergency services in this country or abroad, if applicable.

There is no standard list of items to keep in a first aid kit. It depends on what you assess the needs are. The minimum equipment in a first aid kit in the work place should normally include:

- guidance card giving general first aid advice
- individually wrapped sterile adhesive dressings in assorted sizes
- moist cleansing wipes
- two sterile eye pads
- two large unmedicated wound dressings
- six medium unmedicated wound dressings
- four sterile triangular bandages
- six safety pins
- one pair of disposable gloves

You should not keep tablets or medicines in the first aid box. A resuscitator (for hygienic mouth to mouth resuscitation) may be useful, if staff are trained in using it. A more comprehensive first aid kit may be required if leading groups abroad, for example, and in remote environments.

3.22 Miscellaneous medical hazards

Information about miscellaneous medical hazards will be circulated as necessary by each LA. Some illnesses are nationally very uncommon but may result from activities which take place out of doors.

Weil's Disease typically results from contact with certain types of polluted water and may cause flu-like symptoms. Leaders should be aware of the disease and how it may be prevented including covering cuts and abrasions and wearing footwear to avoid cutting feet. If in doubt consult a doctor. See www.bcu.org.uk

Leaders should know if members of their group are at particular risk of anaphylactic shock, (due to bee or wasp stings or in response to a food allergen) and how the casualty may be treated. An ambulance should be called.

Lyme Disease results from infected ticks. Symptoms are a circular rash appearing after a few days or up to several weeks after the point of infection sometimes accompanied by flu-like symptoms of aches, pains, nausea and fatigue. Avoid walking in long grass or wooded areas unless exposed parts of the body are covered up. Where illness or unusual symptoms occur, take medical advice and be alert to a possible link. Find more information at: www.deseducation.org/outdooreducation

Protection from sun exposure should be considered for all off-site activities. This may include head, neck, arm and leg coverings, high factor (SPF 15 or higher) sun screen, sunglasses and shade. Loose fitting, tightly woven clothing is suitable, as are wide brimmed hats which may need to cover the ears and back of the neck. Drinking plenty of water is important to avoid dehydration. Some people are more prone to the dangers of exposure to sunlight. Activities may need to be modified according to conditions, informed by a risk assessment.

- Find more information about sun protection at: www.hse.gov.uk/skin/sunprotect.htm
- Find NHS advice at: www.nhsdirect.nhs.uk
- Find generic advice on health, safety and wellbeing at:

Devon: www.devon.gov.uk/healthsafetyandwellbeing

Torbay:

www.torbay.gov.uk/index/education/schools/schoolshealthandsafety.htm

DCSF: www.teachernet.gov.uk/healthandsafety

3.3 Safeguarding children

All council employees whose work involves regular or unsupervised access to young people under the age of 18 are screened in conjunction with the Criminal Records Bureau. This is based on the enhanced disclosure.

It is also a requirement that volunteers, including those working on specific projects or providing services for the school, should be checked if they have regular or unsupervised contact with young people.

Heads of establishments who give approval for off-site activities will need to consider whether volunteers, including parents, have unsupervised access to children and whether this is appropriate.

A limited series of pre-checks can be done in one or two days, although, the CRB check takes significantly longer.

Torbay Council requires that every driver and recommends every adult engaged in providing transport on behalf of the council has an enhanced CRB check. This recommendation includes parents or volunteers even if they are not left alone on the vehicle with young people.

Get more information from:

Devon: The Records Disclosure Service, Arlington House,
Park 5, Sowton, Exeter, EX2 7HU, Phone: 01392 688193

Torbay: Child Protection Unit Phone: 01803 208559

Email: cpunit@torbay.gov.uk <http://www.torbay.gov.uk/a-z?id=101>

CRB: website at www.crb.gov.uk

DCSF: information and guidance at:

www.teachernet.gov.uk/wholeschool/familyandcommunity/childprotection/goodpractice/saferrecruitment/

3.4 Insurance

Leaders must satisfy themselves that adequate insurance exists for people and property well before an educational visit or off-site activity takes place. The following outline of each council's insurances, and other insurances which may be assumed to exist, may help leaders to decide what cover, if any, is desirable.

In addition the party leader should consider what insurance is provided by other organisations they are involved with, such as a travel firm, landowner or residential centre. Evidence of adequate Public Liability Insurance (for a sum insured of not less than £5m) should be requested from any third party provider such as a residential or activity centre.

Parents should be aware of the scope of insurance cover provided, particularly for residential programmes.

3.41 School journeys

Insurance cover is automatically provided to schools and colleges for all approved school journeys, both in this country and abroad, without the need for prior notification. There are limited exclusions, the main ones are sailing outside inland and coastal waters, major expeditions, motorcycling and racing other than on foot, air travel other than as a passenger in a licensed passenger carrying aircraft and any person travelling against medical advice.

The school journey policy provides an indemnity against specified risks associated with cancellation, limited personal accident cover, medical expenses, loss of personal effects and legal liability. Each and every member of a school journey party who is either a person involved in full-time or part-time education or a teacher or other adult not over 65 years of age is insured. The policy covers any trip or excursion not exceeding 31 days in duration (including exchange visits and work experience placements) approved by the council which involves travel outside the school boundaries but excludes trips or excursions where insurance is provided as a part of the package price. The policy also includes limited winter sports cover (skiing, ski walks, the use of ski-bobs and toboggans, skating and snow boards but not jumps, with or without ramps), all to a standard appropriate to the person insured's experience and training as judged by qualified instructors.

For mountaineering, rock climbing, caving, diving and other hazardous activities it is a condition of this insurance that the group leader or instructor in charge of the activity has reached an approved standard of competence in the activity the insured people are participating in.

More information about the cover currently provided is available through the links below. Please note that school journey insurance does not cover normal on-site sporting or regular off-site activities or activities carried out by non-education establishments. The exception is activities carried out by Torbay Council's Youth Services.

You can get a claims form from and submit claims to:

Devon: The Insurance Section, Chief Executive's Directorate,
Room G32, County Hall, Exeter EX2 4QD. Phone: 01392 382292

Torbay: The Insurance Manager, Performance Improvement Directorate,
Risk Management Section, Torbay Council, Castle Circus, Torquay, TQ1 3DR
Phone: 01803 207174

Completed claim forms must be submitted by the school, with receipts, and not by individual students or their parents. Claims should be notified as soon as possible, with full details provided within 30 days of the claim or 7 days in respect of riot or malicious damage. The police must be notified as soon as possible in the event of theft or malicious damage.

In the event of accident or sickness requiring urgent medical attention under this policy contact Inter Partner Assistance – UK on (+44) 1737815147 and quote:

Devon: Policy No. SJ-05AA02-0026 issued by Zurich Municipal

Torbay: Policy No. SJ-05U006-0016 issued by Zurich Municipal.

These arrangements do not automatically apply to establishments which do not buy into to the corporate school journey insurance. Establishments or individuals falling outside this scheme may therefore choose to arrange their own travel insurance for school pupils and other members of the party.

We recommend you get a European Health Insurance Card (EHIC) to receive necessary healthcare during a visit to a European Economic Area (EEA) country or Switzerland. The EHIC entitles you to reduced-cost, sometimes free, medical treatment that may be necessary during your stay.

Find more details and apply on-line at: www.dh.gov.uk/

3.42 Personal accident and liability

Pupils attending Devon or Torbay schools and colleges are not insured for personal accident benefits while on education premises. The LA is insured against its legal liability for any injury, loss or damage caused to pupils or students as a result of negligence on its part or that of its employees, servants or agents, including volunteer helpers, subject to these conditions:

a) Volunteers taking charge of hazardous activities such as: mountaineering, rock climbing, caving, winter sports, snorkelling and sub-aqua diving, canoeing, surfing and sailing. Employees must meet the minimum standards of competence and experience defined in this booklet. If there is uncertainty about these standards contact the adviser for outdoor education.

b) Council policies do not cover damage or injury arising from motor accidents in privately owned vehicles as every car user is required by law to insure their vehicle against third

party risks, including liability to their passengers. All claims in these circumstances must be dealt with through the vehicle owner's insurance. People using their own vehicle should check that they have appropriate cover with their own insurers. In the case of collisions between vehicles, the claim will be against the insurance on the vehicle whose driver was to blame. Where school transport is used it is insured by the council providing the school has bought back into the corporate insurance.

If you are using a hired coach it would be sensible to check the insurance with the hire company.

c) Each Council has a limited, special personal accident insurance for teachers in addition to the cover from the school journey insurance. Its benefits are payable to the teacher whether or not there is a legal liability on the part of the council or its employees and their helpers. This is only if the injury is sustained when the teacher is engaged in an extra-curricular activity outside that which they are required to do under their contract of employment.

Benefits also exist under Superannuation Regulations and Conditions of Service.

Devon: Injuries sustained by Devon County Council employees should be reported on Form PO3 or at: <http://www4.devon.gov.uk/eal/docs/apr06/0615023.doc> The same form should also be used to report more serious accidents to young people and members of the public.

Torbay: www.torbay.gov.uk/index/education/schools/schoolshealthandsafety.htm

3.43 Additional insurance

Individuals who feel that the cover from the council's insurers may be inadequate to meet the needs of their family are advised to get a Personal Accident Policy at their own expense. Non-employees are particularly recommended to consider this.

The council expects all employees, pupils and students to accept full responsibility for their personal possessions, including money, and to consider taking out insurance themselves to cover any risk.

3.44 Insurance: transport and travel

Any vehicle insured by, owned by or leased to the council should only be used on official council business. This includes out of school activities if they are in the overall curriculum or form part of the day-to-day routine. The driver should check that their age and licence falls within the insurance companies constraints and meets legal requirements.

The vehicle and driver must be correctly licensed, including PCV or Section 19 where required, at all times or cover may be invalidated.

Young people are often taken on school activities or business in cars driven by teachers. Staff should check that their insurance covers the use of their vehicle on council business. Most insurance companies will provide this cover. The policy must also provide indemnity to the council. Staff should check that any payment or receipt of a mileage allowance will not make their policy void, since some companies might regard this as use for 'hire or reward'.

Under the school journey insurance policy, a limit of £1500 per incident will apply in respect of any loss from an unattended locked vehicle provided the vehicle is in a locked garage.

or visit: www.torbay.gov.uk/schools-finance-and-procurement

3.5 Travel and transport

3.51 Managing groups when travelling

Initial planning, good discipline and appropriate supervision arrangements are essential. The level of supervision required in a vehicle should be considered as part of the overall risk assessment. To ensure adequate supervision a second adult may be needed, unless the journey is local, the group size is small or the young people are responsible.

The transport needs of young people with special educational needs or a medical condition should be assessed. This will help determine what type of supervision, what equipment and what type of vehicle is needed to transport the young person.

If a vehicle needs to stop in an emergency the occupants of the vehicle should remain together under the direct supervision of a responsible adult until assistance arrives. The group leader should normally evacuate the vehicle and move the group to a position behind the safety barrier on a motorway or well away from moving traffic.

On Foot

Pupils should walk in controlled groups. One member of staff should be at the front or in control of the front of the group, another at the back or aware of any individuals who are behind. The degree of control needed will depend on the nature of the group and location. The party leader and other staff need to assess risks before the event and on a continuing basis and consider how risks will be managed.

Where possible, avoid walking on roads and use pavements. Where there is no pavement, walk on the right-hand side of the road, facing oncoming traffic. Large groups may need to keep on the left, with a look out at the front and rear of the group. When approaching dangerous corners on roads without a pavement, the whole party should stop. The leader should move forward until they can see that it is safe, and then the group can move forward. If it becomes unsafe, the leader or assistant lead should use a verbal or visual signal to warn the whole party.

When walking on roads in darkness or semi-darkness, the leaders should wear light clothing or fluorescent markers, and should have a light for front and rear.

Particular care should be taken when groups need to cross a road: use recognised crossings where possible and escort the group from a safe zone to a safe zone. The leader should have sole control of any crossing, being advised by other staff members where necessary. Encourage young people to be considerate of other pedestrians.

By minibus or car

Party leaders and heads should be aware of the high level of accidents related to using minibuses and cars, and the driver's liability to prosecution in the event of breaking the law. A major responsibility also lies with the organiser of the journey. When journeys are planned, heads and party leaders must be satisfied that drivers are aware of the constraints which affect any journey by road.

Some of the major ones are:

- passenger safety
- whether the driver is competent and trained to drive the proposed vehicle and holds the appropriate valid licence
- the experience and capacity of the driver to maintain concentration
- the type of journey; long distance or local
- traffic conditions
- weather conditions
- the journey time and distance, including the length of the driver's day
- emergency arrangements
- insurance cover
- supervision
- stopping points on longer journeys for toilets and refreshments
- suitability of the vehicle for the journey.

Where young people are carried in teachers' or parents' cars every effort should be made to ensure that precautions have been taken to minimise the risk of injury. This may need to include using child-proof locks on rear doors.

Before the journey basic safety items should be checked including; tyres, lights, and windscreen wipers. Vehicle log books and the council's Drivers' Handbook contain the full list of items a driver is expected to check before starting the journey. A similar check should be carried out by volunteers or parents on any car they may provide. These checks should complement regular school-based procedures and garage servicing. It is the driver who is responsible for a vehicle, its suitability and its condition during any off-site journey.

Staff and volunteers should not drive when taking medication, drugs or alcohol or undergoing treatment that might affect their ability or judgement.

On long journeys the party leader should, as a minimum, operate within the Passenger Carrying Vehicles drivers' hours regulations. These state the maximum period of continuous driving should be 4.5 hours, after which a break of 45 minutes should be taken or up to three breaks of up to 15 minutes taken during this time. The maximum period of driving in one day must not exceed 9 hours, after which a period of rest of at least 11 hours should be taken. On long journeys there should be more than one driver, to avoid fatigue.

By coach

On boarding any large vehicle, the same general procedure applies: one adult should board the vehicle and receive the students; another adult ensures orderly access from outside. Reverse the procedure for disembarking.

The party leader should provide for travel sickness and consult with the driver to plan for toilet and refreshment stops.

Staff seating arrangements should reflect the need for adequate supervision and ability to respond in an emergency. On double-deckers, a supervising adult should be present on each deck. Discipline remains the responsibility of the party leader and other supervising adults, never that of the driver.

The council maintains an Approved Bus and Coach Operators List to enable schools to identify operators who are able to provide vehicles and drivers to a minimum standard at all times. This includes seatbelts on all seats and drivers who are CRB checked to the enhanced standard.

Find more information at:

Devon: Email: envtcsqf@devon.gov.uk or phone: 01392 382886

<http://staff.devon.gov.uk/approvedoperatorslist.htm>

Torbay: Email: transport.co-ordination@torbay.gov.uk or Phone: 01803 207685

By air

Before travelling ensure you are familiar with advice and requirements from your travel provider and plan accordingly. In particular consider the needs of group members with special needs or significant medical conditions. In the airport identify an appropriate base and meeting place for the group. Keep luggage in sight at all times; do not leave it unattended. Remind group members to co-operate with safety and security procedures and not to carry goods on behalf of others.

By rail

Where possible, reserve seats in advance so that the group can be kept together and supervised during the journey. Ask station officials about the stopping position of reserved coaches, so that students can be gathered in a place near the carriage. Make it clear to students that unnecessary movement in corridors and gangways will not be allowed, and explain toilet or buffet car procedures. Prior discussion of possible dangers, and alert supervision by adult staff, should eliminate inappropriate behaviour that may lead to injury, accident or inconvenience.

By sea

Difficulties have been experienced by ferry companies with school groups. Party leaders are responsible at all times for their group on board ship and staff should supervise the group throughout the crossing. Procedures adopted by individual ferry companies should be followed. Party leaders should explain the dangers of unruly behaviour and the inconvenience this would cause to other passengers. In the case of shorter Channel crossings this will normally mean staying with their group. For all crossings identify a known meeting point for all group members and consider in what circumstances group members may be allowed on deck. Groups on a boat cruise in the UK should ensure the vessel is registered and inspected by the Maritime and Coastguard Agency.

By underground

Plan in advance for travelling by underground; organise students into smaller groups, each attached to a particular adult nominated in advance. Set up a clear procedure to be

followed by any student who gets left behind or separated because of crowded compartments or because they miss stops.

Buy tickets in advance to avoid delay and congestion around ticket machines and barriers. Students should use escalators in single file, with an adult at the front and back of the group to supervise students getting on and off the escalator. Students should be assembled well back from the edge of the platform until the train doors have opened. Try to avoid rush-hour travel on the underground from 7.30am to 9.30 am and 4.30pm to 6.30 pm.

3.52 Using parents' and volunteers' cars

Where parents and volunteers' cars are used on school activities the head should notify parents and volunteers of their responsibility for the safety of pupils, to maintain adequate insurance cover and to ensure their vehicle is roadworthy and has a current MOT certificate.

The head or party leader will need to consider the suitability of parents or volunteers to carry young people in their car and whether vetting is necessary. We advise that parents or volunteers are not put in a position where they are alone with a young person other than their own child.

A draft letter for schools and other establishments to send to parents and volunteers who use their cars to transport young people on activities is available. There is also a form for parents and volunteers to return to the school, indicating they have read and understood the requirements.

Visit: www.deseducation.org/outdooreducation and click on *Supplementary Guidance*.

Seat belts and child restraints - including booster seats and booster cushions

- Children under the age of 12 and under 1.35m in height must use the correct child restraint when travelling in a car. Exceptions include the rear seats of a taxi and for unplanned and unforeseen journeys.
- Every young person travelling in a car should wear a seat belt or appropriate child restraint. The correct child restraint should always be established by weight and should fit correctly. Vehicles without seat belts or appropriate restraints should not be used. The central lap belt in the back seat of a car should not be used to carry children who require a child restraint.
- Side facing seats should not be used as they only have lap belts and injuries are more likely to occur in an accident.
- Children who require a child restraint should not use the front seat of a car.
- The 2006 seat belt regulations are not a legal requirement in a minibus.
- Minibuses and coaches used to carry three or more young people aged 16 or under must be fitted with seat belts and a forward facing seat for each young person.
- Young people riding in the front passenger seats of minibuses must use a seat belt which is not a lap belt. It is the council's policy that no child under the age of 11 should use the front passenger seats of a minibus.
- Passengers in minibuses must be told of their responsibility to wear a seatbelt.

Find more information at: www.devon.gov.uk/healthsafetyandwellbeing

3.53 Licensing and additional requirements for vehicles

Passenger Carrying Vehicle (PCV) Licensing Requirements are a legal requirement for any minibus used for 'Hire and Reward'. This covers any payment for the trip, even if it is for only a small amount for fuel.

The only exemptions are if:

- the organisation is non-profit making, and a Section 19 Permit (Small Bus Permit) has been issued to it
- a Section 22 (Community Bus Permit) has been issued to run a voluntary non-profit making bus service using unpaid volunteer drivers.

A Section 19 (Small Bus Permit) must be held before undertaking any trip where a payment is made defined as 'Hire and Reward'. LA schools can get permits from the Transport Co-ordination Service.

Driving licence categories

Category	Vehicle covered	Explanation
D	Passenger carrying vehicle (PCV) of any size	Vehicles able to carry more than 9 passengers (no upper limit)
D1	Passenger carrying vehicle (PCV) Minibuses	Vehicles able to carry 9 - 16 passengers including 'for hire and reward'
D1 Restricted	Minibuses restricted to non PCV use	Vehicles able to carry 9 - 16 passengers but only if it is not 'for hire and reward'
B	Cars	

If a Category B driving test was taken before 1 January 1997, Category D1 Restricted is also granted. If the driving test has been taken since 1 January 1997, Category D1 Restricted is not granted.

Devon

Any Devon County Council member of staff or volunteer driving any minibus on a school journey or similar programme must be a council approved minibus driver, through having satisfactorily completed the minibus test or obtaining a PCV driving licence prior to driving passengers in a minibus. Refresher training must also be done every four years.

Devon County Council

Council vehicles can be used if all these conditions are met:

- the driver is approved through the Transport Co-ordination Service (TCS) either by:
 - passing the approved minibus driver test organised through Devon Drivers' Centre at Westpoint 01392 444773
 - or
 - holding a PCV licence and registering with TCS by sending a photocopy of the licence - PCV licence holders are not approved until registered with TCS
- the activity must be funded, approved or organised by an LA establishment

- the group, if outside DCC, is TCS approved - Community Hire Scheme.

Torbay Council

Drivers of a Torbay Council owned minibus must have a D1 licence, have undertaken a Devon County Council minibus test or a semi-automatic test through Torbay Council, and a copy of the driving licence must be sent to the Torbay Transport Co-ordination Centre. Requirements for school owned vehicles will be determined by individual schools in accordance with their insurance company requirements.

Vehicle loading on minibuses and other vehicles

The driver is responsible for any load carried. There must be uninterrupted access to all doors; luggage and equipment must not block gangways or doors or access to them. Doors must be left unlocked when the vehicle is carrying passengers.

The balance of the vehicle must also be considered, particularly when roof racks or trailers are used. The manufacturer's maximum permitted weight must not be exceeded. This is commonly 100kg on a Ford Transit minibus and 90 kg on an LDV.

Towing

Passengers should not be carried when towing a trailer if the emergency doors (the second doors in addition to the normal access door) are rear-facing, as in the event of an accident the trailer is likely to block the emergency doors. Any minibus carrying passengers while towing should have a separate emergency door fitted at the rear offside, if necessary in addition to rear facing doors.

Drivers must comply with driver licensing requirements for towing trailers. See INF 30 Towing Trailers in Great Britain available from the DVLA at: www.dvla.gov.uk

Taking a minibus abroad

Minibuses suitable for carrying 10 or more people, including the driver, must be equipped with a calibrated tachograph for all journeys through EU countries, including Eire. Drivers travelling abroad need to be aware of EU regulations and regulations of other countries for drivers' hours, licences and other requirements.

When the vehicle is abroad it must have:

- copy of fully comprehensive insurance certificate
- a Waybill
- a Model Control Document
- an Own Account Certificate
- five star breakdown cover
- driving licences
- MOT certificate
- V5 Vehicle Registration Document
- Tachograph Calibration Certificate.

You can get most of these from the Transport Co-ordination Service phone: 01392 382783. Please make sure you give adequate notice. The Own Account Certificate will need to be completed before sending it for validation.

Section 19 (Small Bus Permits) are not valid abroad, and the driver must hold a PCV licence, Category D or D1 (unrestricted). Category D1 Restricted is not valid abroad.

Minibuses abroad must have these on board at all times:

- fire extinguisher
- first aid kit
- warning triangle
- spare set of bulbs.

Training and additional information

Get additional training in driving minibuses from Devon Drivers' Centre.

3.6 Finance

The head should ensure that parents are given reasonable notice of the costs of educational and off-site activities. The head should establish secure procedures for managing associated income and expenditure including clear banking and accounting procedures.

3.61 Charges for school activities

The Education Reform Act 1988 and the subsequent *Education Act 1996* determined aspects of education that charges may be made for.

These key principles may be considered to apply for off-site activities:

- Education provided wholly or mainly during school hours should be provided without charge.
- Off-site activities can be financed through voluntary contributions, although this should not lead to parents who do not contribute being treated any differently. If insufficient parents contribute this may lead to such activities being cancelled.
- Charges can be made for the board and lodging element of any residential programme. For a residential activity taking place mainly during school time, or which meets the requirements of the syllabus for a public examination, or is to do with the National Curriculum or religious education, no charge may be made either for the education or for the cost of travel. This does not stop a voluntary contribution being sought.

- A charge, not exceeding the actual cost, may be made for board and lodging, except for young people whose parents are receiving Income Support, Income-based Jobseeker's Allowance, Child Tax Credit (where the parent is not entitled to Working Tax Credit and whose annual income does not exceed £14,155), support under part VI of the Immigration and Asylum Act 1999 or guarantee element of State pension credit. The eligibility criteria are aligned with free school lunch eligibility.
- Programmes which take place wholly or mainly outside school hours, and are not part of statutory curriculum provision may be considered as optional extras for which charges can be made. The charge for a pupil should not exceed the actual cost of providing the activity divided equally by the number of pupils participating (it will not include a share of the cost of any remissions).
- Educational visits and off-site activities may also be paid for by special fund raising events, donations or sponsorship, subsidy from school or other funds or charitable grants.
- Each school should have a policy on charging for school activities. The council has issued guidance on these arrangements.

For more information see:

Devon: Model Charging Policy

www.devon.gov.uk/dgs-model_charging_policy.doc

Torbay: Guidance on Charges and Remissions

www.torbay.gov.uk/charges-and-remissions-policy

3.62 VAT

Recovery of VAT for school trip expenses depends on all of the rules being correctly applied. These are complex and should be checked as part of your planning process. This includes the obligation for the head to complete a certificate of VAT recovery and confirm that the trip was of an educational nature. The certificate should be kept with the paid invoice.

Get more advice from:

Devon: Contact the Tax Team on 01392 382410. Also see ED/4 of the VAT manual.

Torbay: Phone: 01803 208208 or visit: www.torbay.gov.uk/schools-finance-and-procurement

3.7 Retaining records

We recommend that parental consent forms, approval forms, event specific risk assessments and associated programmes should be kept for the school year concerned and the following 12 months, and then can be disposed of.

However, if a pupil has received an injury they have until the age of 21 to submit a claim. Any records, including parent consent forms, approval forms and risk assessments which relate to a HSE reportable injury, or equivalent incident abroad, should be kept for that length of time

3.8 Checklist of information to parents, guardians and carers

The list below gives the information which should be given in writing to parents before getting their written consent for journeys abroad or residential visits in the U.K. We recommend that form SOE3 is used for this purpose or adapted where necessary. Parents may need less information to give consent for day visits but, if the return is after school hours or adventurous activities are included, most of the information below will be needed. Local visits on foot, in school time, to low risk venues do not normally need written parental consent. Parents should be informed of this principle when the child starts in the school or in the handbook for parents. It is good practice to notify parents in advance about all off-site visits and activities. A specific programme of events occurring over a period of time, such as a term, may only need one consent form. However, parents should be kept informed of other specific arrangements for each part of the programme.

1. Dates.
2. Objectives of visit or activity.
3. Times of departure and return, including location for meeting parents.
4. Method of travel including name of any travel company.
5. Accommodation with address and telephone number, including details of host families for exchange visits.
6. Emergency contact arrangements, at home and away, if all young people are not at one centre. Consider using a 'telephone tree' to make easy and rapid contact with a large group of parents, for things like changes to transport arrangements.
7. Name of party leader and accompanying staff.
8. Names and status (such as parent or member of the governing body) of other accompanying adults who will have some responsibility during the visit.
9. Details of activities planned. Any activity involving special hazards must be clearly specified.
10. Charges or voluntary contributions and what they cover.
11. Methods of payment and cancellation arrangements.
12. Insurance used for baggage, personal accident, cancellation and medical cover for the group members. Send a photocopy of the insurance schedule to all parents or state that a copy of the schedule can be obtained from the party leader if needed.
13. Clothing, footwear and other items to be taken. Prohibited items may need to be highlighted.
14. Money to be taken.
15. Code of conduct and details about the standard of behaviour expected from the group during the visit, including, where appropriate, rules on general group discipline, smoking, sexual behaviour, illegal substances and alcoholic drinks.
16. Parents should complete a medical form for all residential visits and give their written consent for emergency medical treatment.

Parents should be invited to a planning meeting, especially where a residential experience is involved, for visits abroad or where the activity constitutes a significant new direction for the group members or the establishment. This provides the opportunity for everyone to be fully informed and to raise issues which may be difficult to address in writing. For people over the age of 18 a parental consent form is not needed. If a young person is in the care of the council their care plan should say who can consent to off-site activities. For Category A activities an agreement will normally be reached for consent for a range of activities during the time the child is receiving care. A consent form agreed with the client and, where appropriate, someone acting on their behalf, should be completed for all activities in Category B or C.

3.9 Emergency procedures

Emergency procedures are an essential part of planning a visit or off-site activity. If an accident occurs the priorities are to:

- assess the situation
- safeguard the rest of the party
- attend to the casualties
- inform the emergency services by calling 999 or 112.

An emergency is difficult to define. It may be a fracture, food poisoning or a fatality, or an illness requiring immediate medical treatment. It may on the other hand be missing children who are soon found or a coach crash in which no serious injuries are sustained. The following notes are for guidance. These notes are for guidance and the procedures listed will not all apply to all emergencies.

1. Assess the nature and extent of the emergency.
2. Make sure all other group members are safe from danger and are looked after.
3. Give first aid and attend to any casualties.
4. Call the emergency services as needed. As a minimum you are likely to be asked:
your precise location
a description of the incident
the time of the incident
the number of casualties
the nature of any injuries
the total number in the party
your telephone number
If the police are involved they will take any statements.
An adult from the party should accompany any casualties to hospital.
5. Supervise and support the rest of the group and arrange for their return to base.
6. Inform young people whether they may use any mobile phones and in what circumstances.
7. Arrange for one adult to remain at the incident site to help or liaise with the emergency services.
8. Contact the off-site base to communicate with other staff in the party (outdoor centre, hotel, youth hostel etc.)
9. If the party is abroad, consider contacting the local British consulate or embassy to seek their support.
10. Contact the head, emergency contact point or designated senior member of staff with the information listed under point 4 above and:
names and telephone numbers, if necessary, of individuals involved
names of other members in the party
action taken so far
action to be taken and who will do it
telephone numbers for future communication.
11. For a serious incident, where the media may be involved, identify alternative phone numbers at home and off-site base as other lines may quickly become jammed.
12. The head or designated senior member of staff may need to contact the Director for Children and Young People's Services or the nominated officer in the Directorate's Emergency Plan, give details of the incident and:
 - Identify action required, which may include financial assistance.
 - Identify alternative and additional telephone lines

- In cases of a major incident out of hours involving the emergency services, the police will make direct contact with the Emergency Planning Service Duty Officer who will then take appropriate action.
13. The head will arrange to contact parents and carers of those involved as soon as possible. For a serious incident the head should contact parents of all party members. It is also the responsibility of the head, or designated support staff, to act as a link between the group involved, the chair of governors, the council and parents.
 14. The Council will normally liaise with the media*. A designated person should act as the ongoing point of contact with the media and all involved should direct questions and requests to them. This person will need to liaise with the emergency services, perhaps on site. (*This assumes that, should a school be involved, they have subscribed to the Press and PR Service.) The school website can provide a useful means by which general information is made available and updated.
 15. Write down all relevant details while still fresh in the memory. Other group leaders may be asked to do the same. A record should be kept of names and addresses of any witnesses. Keep any equipment involved in its original condition. If possible do not disrupt the scene of the incident until a full investigation has been completed.
 16. Restrict access to a telephone until you have informed the head and there has been enough time for the head to contact those directly involved.
 17. Legal liability should not be discussed or admitted.
 18. Refer requests from the media to the designated individual as identified above.
 19. Contact insurers, particularly if medical assistance is needed.
 20. Complete and forward all accident forms and reports.
 21. For serious incidents consider further professional counselling support for those directly or indirectly involved.

A mobile phone is an essential item of equipment for a party leader and may save valuable time in the event of an emergency. Staff members should know the mobile phone numbers of other key staff in the party. However, difficulties frequently arise with mobile phones due to reception, battery power or insufficient credit. Mobile phones should complement and not replace traditional safety and communication procedures. Keep details of these emergency procedures to hand and ensure that you can implement them. Where the emergency requires additional support or is of a serious nature contact:

Devon:

Corporate Contact Centre phone: 0845 155 1015 during office hours.

CYPS Directorate phone: 01392 383369 during office hours.

Emergency Planning Team phone: 07699 734637 out of hours pager number but available 24 hours if the above number is unobtainable. You may then be transferred to a senior officer in CYPS.

Torbay:

Torbay Council phone: 01803 208224 during office hours.

Torbay Council phone: 01803 550405 out of office hours 24 hour control.

Section 4

Leadership for specific environments and activities

The way the party leader and other members of staff manage an off-site visit or activity is generally the most important factor in determining the programme's success, in terms of educational outcomes and the health, safety and wellbeing of all group members. The party leader must be competent to manage the programme; in other words they must bring suitable expertise and experience to the tasks at hand and carry out those tasks in a common sense manner. The party leader will generally be supported by other staff and volunteers who bring experience and expertise to the roles they carry out. For many activities the required level of competence is recognised by a specific qualification, appropriate to that environment.

As part of the risk assessment process the party leader and other staff need to consider the extent to which they may need to intervene to prevent access to dangerous situations – for example near traffic, near water or where a fall from height could occur.

The party leader may hand over responsibility for managing a particular activity to someone else who is qualified in that activity. This is frequently the case when groups visit an adventure centre for example.

4.1 Education and training for staff and volunteers

Courses on managing or delivering outdoor activities are available through Devon Education Services and through Devon Discovery. Courses and training opportunities are also available through a wide range of other providers, including national governing bodies. Reference is made to course providers for activities listed in each section. Devon Education Services also provides educational visits co-ordinator training.

Devon Education Services: www.deseducation.org/outdooreducation

Devon Discovery: www.devon.gov.uk/devondiscovery Phone: 01822 890761

4.2 Educational visits

Educational visits typically comprise activities where the risks encountered are similar to those experienced in every day life. For the purposes of this document they generally fall in Category A (see Section 2.5).

DCSF provides *A Handbook for Group Leaders*. This handbook is aimed at anyone who leads groups of young people on any kind of educational visit. It sets out good practice in supervision, ongoing risk assessment and emergency procedures.

Find it at: www.teachernet.gov.uk/visits

Growing Schools is a government programme which aims to harness the full potential of the outdoor classroom as a teaching and learning resource.

See: www.teachernet.gov.uk/growingschools

The recommended minimum staffing ratio for educational visits is 1 adult to 15 pupils. There will, however, be many occasions where a higher ratio is required, informed by risk assessment (see Section 3.1).

4.21 Visits to urban, coastal and countryside locations

The party leader should be familiar with the general area the group will be working in and should brief the group before the visit and on site. Comfort and safety factors will apply to this environment although the party leader does not need a formal qualification.

An initial briefing to group members may emphasise hazardous locations such as busy junctions, road crossings, wasteland, canals and other water side locations or narrow pathways.

Where groups are not directly supervised refer to the section on remote supervision (Section 3.17). Clearly explain meeting points and choose a location the group is familiar with. Emphasise the importance of time-keeping.

The leader may need to alert group members to the potential risks from other members of the public, for example, in public lavatories or subways.

For all visits:

- have a recall procedure
- consider footwear and clothing likely for the best and worst conditions you may face, including spare clothing should circumstances require
- negotiate or plan your route bearing in mind rights of way and access and the Countryside Code
- beware of the unexpected towards the end of the day or journey as your supervision or the attention of group members may relax
- consider health and hygiene issues (also see Section 4.26 farm visits).

Find details on the Countryside Code at:

www.countrysideaccess.gov.uk/things_to_know/countryside_code

Activities or fieldwork in or adjacent to rivers, lakes or other water features require particular care. This is especially the case in times of flood or where banks are slippery.

DCSF provides *Group Safety at Water Margins*. This guide is aimed at anyone who organises learning activities that take place near or in water, such as a walk along a river bank or seashore, collecting samples from ponds or streams, or paddling or walking in gentle, shallow water. See: www.teachernet.gov.uk/visits

Particularly during summer months blue-green algae has been found at a limited number of sites in Devon, causing mild or severe illness where people are in contact with contaminated water. The Environment Agency in the South West can give you up to date information on affected sites. Environment Agency, South West Region, Manley House, Kestrel Way, Exeter EX2 7LQ. Phone: 08708 506506.

4.22 Walking in non-remote environments

Most coastal and countryside activities fall within Category A (see Section 2.5). However, the party leader will need to take note of additional hazards when supervising groups in such environments. Training and qualifications for staff leading a group may be advisable or essential.

No formal qualification is needed to lead groups in coastal and countryside environments unless the programme is a Duke of Edinburgh Award expedition. This also applies to mountain or moorland environments below 600 metres and in summer conditions where activities take place within approximately 30 minutes of a minibus, other transport or place of habitation. Other comfort and safety factors will, however, need to apply as appropriate, for clothing and equipment, manageable group size, adequate communications and control of the group, informed by risk assessment. For further details see 'Land Based Activities' below. The course Coastal and Countryside Leadership is recommended.

Find training opportunities at: www.devon.gov.uk/devondiscovery

As with all activities the party leader's judgement will be paramount. The activity or journey should be matched to the party in terms of terrain, aims, distance, equipment available, clothing, weather conditions (both current and forecast), degree of supervision and time available. Group leaders should count students at regular intervals.

The leader should set a pace which allows for the speed of the slowest member of the group. The leader controls the frequency and duration of rests and rest periods should be appropriate to the whole group. Group leaders should set an easy pace going uphill and control the speed of the group going downhill. In forested areas keep away from active machinery or felling. Be aware of the hazards in woodland caused by severe winds. In cold or windy weather, or after a hard climb, put on extra clothing, even if the rest period is brief.

4.23 Forest schools

The Devon Forest School Network has outlined standards for safe practice which should be followed by schools in the local authority. Schools buying-in expertise to support Forest School provision should ensure that the provider meets these standards:

- OCN or BTEC Forest School Leader or Practitioner Award at Level 3
- current and enhanced CRB disclosure
- valid first aid certificate
- valid insurance certificate (Public and Employer's Liability)
- staff handbook which should include:
 - risk assessments for site, activities and staff
 - health and safety policy
 - child protection policy and procedures
 - woodland management plan.

Schools delivering a forest school programme without external support should ensure they work to equivalent standards of training, planning and management including risk assessment.

For more information, including training contact:

Devon Forest Schools Coordinator, Devon Discovery phone: 01882 890761 or email:

devon.discovery@devon.gov.uk

4.24 Beach and coastal safety

The local beaches and coastal areas offer a wide range of opportunities for study and activities. However, whilst presenting many challenges and interests, areas where the land meets the sea present their own hazards.

A high level of vigilance and supervision is needed when close to any stretch of water, even shallow water. The sea needs extra care and attention. When planning activities in coastal areas bear in mind that:

- tides, swell, wind, currents, beach profile and sandbanks may present difficulties -exit routes must be checked well in advance and at all times during the activity
- swimming should only take place as part of a carefully supervised activity conducted by suitably qualified leaders, no matter how inviting the sea may seem. Pupils should swim in company and in sight of supervisory staff
- paddling may be permitted where there is no intention or likelihood of swimming or of individuals getting out of control, provided risks have been assessed and there is adequate supervision. Group leaders who are supervising water-based activities should be competent in water rescue and life saving techniques including cardio-pulmonary resuscitation (CPR)
- beaches present their own problems, particularly when large numbers of the general public are present. Establish a base where members of the group must return if separated from the rest. Look out for warning notices and flags
- be aware of the possible presence of dangerous debris such as glass, syringes, sewage, barbed wire or marker flares
- digging in the sand, particularly in cliffs or dunes could cause cave-ins
- climbing on rocky beaches and cliffs should be discouraged. On the South West coast a lot of rock is loose and crumbly. Do not work or base groups under such sites or allow young people to knock down or throw stones
- weed covered rocks may make surfaces very slippery
- Stay on the path on cliff tops. If the route is unfamiliar to the leader a responsible adult should be at the front. Cliff tops are exposed areas and may experience rapid changes in weather conditions. Young people should be briefed about significant risks, including cliff edges and should be appropriately supervised. Clothing, route choice and group management should reflect this.
- be prepared to seek advice from the coastguard, the Met. Office or the adviser for outdoor education. Only do activities and projects which you have the necessary experience and competence to do.

Beach and coastal safety awareness courses are available. Contact Devon Discovery on 01822 890761 or visit **www.devon.gov.uk/devondiscovery**

For more information read *Group Safety at Water Margins* from DCSF at www.teachernet.gov.uk/visits

4.25 Open water swimming

Outdoor swimming is an enjoyable but potentially hazardous activity. It may involve swimming in the sea, a lake or river. The use of recognised bathing areas will reduce potential hazards. See also the section on Beach and Coastal Safety. The details below apply to activities in the UK and abroad.

Leadership qualifications

- **Life guard patrolled beaches.** The leader must hold a minimum of the RLSS Bronze Medallion or equivalent. The group must follow the advice of the lifeguards and stay within the supervised area. Note that the role of the life guard complements, rather than replaces, the role of the qualified member of staff, unless specific agreement has been reached with the lifeguard that they are able to supervise your group.
- **Beaches with no lifeguard present.** The leader must hold a minimum of the RLSS Bronze medallion award or equivalent. Only known safe swimming beaches should be used. Leaders must take into account the limitations of their own experience and competence. They must ensure that the prevailing conditions are suitable both for themselves to act as the life guard, and for the ability of the group.
- **Lakes, rivers and canals.** Swimming in these environments presents particular risks in terms of depth, temperature and access which must be carefully assessed beforehand. Gain local information about any dangers. The leader must hold a minimum of the RLSS Bronze Medallion or equivalent and be capable of a rescue from the deepest part of the swimming area.

In all cases the leader must be aware of the limitations of their own experience and competence. Where splash about swimming takes place, for example at the end of a canoeing or sailing session, the lifesaving and supervision should be provided by the canoeing or sailing instructors, provided that the swimmers wear a buoyancy aid.

Recommended minimum staffing ratios - 1:10

A competent assistant is required for all but the most manageable groups, particularly where there is no lifeguard present. A competent member of staff must be land-based observing the group at all times. Leaders should consider the merits of a buddy system, limiting the number of swimmers in the water at any one time, and keeping swimmers within their depth.

Safety factors

Leaders should be aware of the effects of sudden immersion in cold water. The leader should make an assessment of the risks posed by the prevailing conditions: for example, surf and tide, the weather, currents, wind, undertows, cold, weeds, polluted water and the stability of the sea or river bed. Leaders should also get local information where possible.

Lakes, rivers and canals will generally be colder than the sea. An area of operation should be designated, and the leader should know the commonly used signals of distress and recall. A signal system should be adopted.

For example:

- to gain attention is one blast of the whistle
- to clear the swimming area is two blasts of the whistle.

The leader should have appropriate rescue equipment to hand such as a throw line, a buoyant rescue device or something for a struggling swimmer to hold onto.

The leader should be in control of the whole group, including those out of the water. All members of the group should be competent swimmers in the light of the conditions and the degree of supervision; it is worth noting that young people who drown are often strong swimmers. Do not allow anyone to swim within 30 minutes of eating. In a private or hotel pool, where there is no lifeguard on duty a supervisor must hold the RLSS Bronze Medallion or equivalent.

For swimming activities in pools and open water also see *Safe Practice in Swimming Activities* from Devon Education Services available on 01392 384862.

Open water swimming: children's homes

Recommended practice is as outlined above and requires that staff hold the RLSS Bronze Medallion or equivalent qualification. For young people in residential care, groups of one to three people taking part in occasional family-type swimming activities may be supervised by staff without this award provided that:

- the manager of the establishment ensures a risk assessment is completed for each proposed swimming location
- preference is given to the use of beaches where a lifeguard is present and on duty, with swimming taking place in the area designated by the two red and yellow flags
- where there is no lifeguard on duty the beach is considered to be a safe beach by the local district council
- similar checks are made when using other sites regularly used by the public for open water swimming
- the member of staff designates an area for swimming and retains a supervisory role from the water's edge, taking into account the risk assessment. The whereabouts of the nearest telephone contact point should be known in case of emergency.

Find training opportunities and more information at: Royal Life Saving Society

www.lifesavers.org.uk

The DCSF publication *Group Safety at Water Margins* can be found at:

www.teachernet.gov.uk/visits

4.26 Educational visits to farms or industrial sites

Visits to working farms are a regular feature of education for young people from both rural and urban environments. Such visits are beneficial to young people, helping them to appreciate the origin of their food and learn about aspects of rural life.

The risks

Experience over recent years shows that visits to farms can carry a small risk to young people of acquiring infection, particularly gastroenteritis. Several micro-organisms are commonly present in livestock animals and may cause gastroenteritis in humans. They

may be found in faecal droppings and elsewhere in the farm environment. Farm visits may result in a risk of transmitting infection directly because the substance eaten is infected or contaminated. In addition, children's fingers may become contaminated with animal faeces which is then transferred to their mouths when eating or simply sucking their fingers or thumbs. Pregnant women are advised to avoid visits to livestock farms, particularly during lambing.

Health and safety precautions

Farmers and visit organisers need to be aware that visitors may be more susceptible to infection from the farm environment and its products than are those who live in that environment. Prevention depends primarily on simple hygiene measures which, if followed, will help ensure the visit is well-managed and safe. Parents, teachers and young people should be made aware of these measures and they should be re-emphasised before and during the visit.

For the farmer:

- The hazards that farms can pose to personal safety should be stressed to young people and teachers on their arrival.
- A high standard of physical and general cleanliness is required in all areas to be visited by young people.
- Plenty of fresh bedding should be provided for stock to minimise the risk of contact with dung. Areas should be hosed where appropriate.
- Sick animals - especially those with scour (diarrhoea) - must be isolated well away from visitors.
- Adequate hand washing facilities must be provided for visitors, including soap, running water and disposable hand towels (not roller towels). Toilet facilities should also be available.
- A separate clean area must be set aside for eating if refreshments are taken on site.
- Children should not be allowed to taste animal feed or raw milk.
- Safe areas for observing farm activities, such as milking, should be available.
- Slurry pits, chemical stores, electric fences, machinery, stacks of hay or straw and grain stores all present potential dangers and should be clearly identified as hazardous. Visits must be planned with due consideration to such hazards.

For teachers, parents and volunteers:

- Try to carry out a pre-visit to identify specific hazards.
- Ask young people with cuts or abrasions to cover them with a plaster.
- Provide a briefing for young people at the farm to cover the points in these guidelines.
- Ask young people to keep their fingers out of their mouths and not to eat refreshments until they have washed their hands.
- Young people should not sample, taste or take away any animal feed stuff or raw milk or drink from farm taps.
- Children should be closely supervised if direct contact with animals is likely. If this happens they should be made to wash their hands afterwards. They should not be allowed to kiss or put their faces close to the animals.
- Children and adults with asthma or hay fever may experience difficulty at certain times of year.

- Be aware of moving machinery, such as tractors, and do not allow children to touch any machinery or tools unless directly supervised.

Although the guidelines have been written with farms in mind, the general principles should be followed when visiting similar establishments such as zoos and wildlife reserves.

The Countryside Educational Visits Accreditation Scheme (CEVAS) accredits farm staff who are working with school groups and endorses the farm premises as being appropriate for school visits.

4.3 Sponsored walks and large scale events

There are particular hazards associated with large scale events and from undertaking sponsored walks on roads. Check with local police where necessary. Consider alternative routes or means of achieving the same objectives, such as the use of a non-road environment or different activity.

For large scale events planned on Dartmoor contact the Recreation Officer at Dartmoor National Park on 01626 832093 or email: recreation@dartmoor-npa.gov.uk to discuss your plans.

For other large scale events you may need to ask the adviser for outdoor education for additional guidance.

4.4 Residential visits

These may involve any organised activity which incorporates one or more nights away from home. Residential visits could involve a visit to a centre, a youth hostel or an extended stay on a narrow boat. The supervision of any group overnight involves additional responsibilities for the party leader and other staff. (See Section 3.16 for information on supervision during residential visits.)

The selection of a reputable tour operator is recommended, where appropriate. This should form part of the risk assessment. Establishments should ask operators to confirm their safety management procedures and say if they have been externally verified. The School Travel Forum was formed in 2002 and has developed a code of practice which its members must adhere to, see www.schooltravelforum.com

Residential courses where young people live and work together provide valuable learning opportunities and an exciting environment, but demand an awareness of safety factors.

If you plan to use commercial, charitable or private facilities read Section 4.6 and use form SOE5 to confirm standards of provision meet council expectations.

- Dormitories should normally be for a group's exclusive use. However, risk assessment may allow flexibility.
- The party leader should consider whether security arrangements are adequate to stop unauthorised visitors.
- Young people should be able to contact members of staff in the event of an emergency overnight.

- Supervisory staff should ideally be accommodated in rooms adjoining or close to their group.
- Young people and staff should know the lay out of the accommodation, key personnel, fire precautions and exits and necessary regulations and routines.
- Access should be available to groups' rooms at all times by members of the accompanying staff.

Fire safety

Fire safety must be considered by the party leader in any residential centre. Local procedures, particularly for raising the alarm, evacuation of the building and location of the assembly point must be understood by all group members. Where no local procedures exist the party leader should formulate them on arrival. If the group is abroad make sure any fire precautions are understood.

A fire drill should be held on the day or evening of arrival. The fire alarm must be audible throughout the accommodation. The party leader should be confident that all emergency exits can be used as such. Keys must be readily available for any doors which are locked. A responsible person should have responsibility for each dormitory group and have a torch available should emergency lighting not be provided.

4.5 Visits abroad

Visits abroad provide valuable and rewarding educational experiences. They include cultural and language study trips, exchange programmes, activity programmes such as ski courses and expeditions. All visits abroad require detailed planning and preparation, well in advance of the visit.

Groups should seek to use the services of a reputable tour operator experienced in group travel. Air travel organisers may be licensed through ATOL (Air Travel Organisers Licence) for all or part of a package. It is recommended that establishments use tour companies which are members of a Department of Trade approved bonding body; such as the Association of British Travel Agents (ABTA) or the Association of Independent Tour Operators (AITO). Ensure you have ready access to your insurance company telephone number.

Party leaders may ask tour operators to complete form SOE5 to ensure they meet the standards expected by the council, also see Section 3.5 Transport and travel.

The *Package Travel Regulations 1992* may apply. Where schools independently provide a package they should ensure they act within the regulations.

In addition to the Planning checklist at the beginning of this booklet, party leaders planning visits abroad should:

- identify whether there are medical requirements imposed by the country being visited
- ensure all participants have a European Health Insurance Card (EHIC) for all visits to member countries of the European Union – this is available from Post Offices at www.doh.gov.uk or by phoning 0845 606 2030.
- ensure all members of the party carry the address and telephone number of the hotel or hostel in case of separation

- identify an emergency contact for parents
- brief young people about any local hazards and emergency procedures, including the use of telephones
- discuss any local customs and cultural issues
- agree codes of conduct with young people
- check visa and passport requirements - photocopies of passports and other essential documents may prove useful. A collective passport can be used for groups of between 5-50 young people. Everyone on the collective passport must be a British National.
- Consider language ability as part of their risk assessment.

For details about collective passports and other passport enquiries visit: www.ips.gov.uk or phone 0870 521 0410

For visits to third world countries, or where there is uncertainty about safe practice, read the latest advice from the Foreign and Commonwealth Travel Advice Unit at: www.fco.gov.uk Click on Travel Advice by Country.

Consider a number of 'what if' scenarios as part of the risk management process. Ask and answer questions such as 'What would I do if... a young person got lost, was ill, was caught shoplifting and arrested or lost a passport or the group was stranded due to transport failure?'

A minimum staffing ratio of 1 adult to 10 group members is recommended for visits abroad. In normal circumstances each party should be accompanied by two adults, at least one of whom should be a member of staff.

On visits abroad and exchange programmes schools should consider providing pupils with a brief statement in the language of the country they are visiting describing the context of the visit. This might also show the name and contact number for a member of staff who speaks the language. These details should be carried by pupils at all times.

4.51 Exchange visits

The success of a foreign exchange is largely dependent on good relationships and planning and communication with staff in the host school or youth group.

In particular party leaders should:

- check the status of the exchange programme provider to ensure they are a legitimate organisation, with links to a professional or governmental body
- seek information about the exchange school and the accommodation and guardianship to be provided
- seek reassurances from the host school about procedures for checking the suitability of host families – particular care should be taken if external agencies are used to recruit host families
- consider whether the individuals undergoing the exchange are suitable and able to cope with the change in culture and separation from home
- ensure all group members have easy and accessible contact in the host country, preferably by telephone with a member of their own staff - mobile phones can be very useful for this
- make young people aware of the ground rules agreed between the party leader and the host family

- ensure home stay exchanges are well-planned, with sensible pairing arrangements
- for reciprocal home stay exchanges in the UK liaise with the school's child protection officer to help ensure the suitability of hosting arrangements
- within the UK inform host families that CRB checks may be carried out on a sample basis and if anyone is not happy about this arrangement then they should not agree to take part. This provides an important deterrent effect and enables CRB checks to be carried out if necessary
- provide host families with details of medical or dietary needs
- make sound arrangements for collecting and returning members of the party
- brief young people regarding emergency arrangements and encourage contact with their staff in the case of anxiety or concern.

Find information from DCSF and links to other key organisations at:

www.teachernet.gov.uk/management/atoz/e/europeanandinternationallinks/

Additional information about good practice on exchange visits has been produced by the Outdoor Education Advisers Panel at:

www.deseducation.org/outdooreducation in the section on overseas visits.

4.52 Overseas expeditions

Expeditions by schools to remote areas, and to developing countries, are becoming increasingly common. Such expeditions should be undertaken with great care to ensure that the objectives are clearly identified and reasonable, group members have appropriate prior experience to cope with the challenges of the programme, the expedition is led by appropriately competent leaders and emergency arrangements are suitably thorough. Leaders should consider value for money and the extent to which such an opportunity provides sound educational benefits. Parental consent must be based on a thorough explanation of the intended programme by the provider including travel and accommodation arrangements, all planned or possible activities and associated risks.

Plans to take part in overseas expeditions should be notified to the adviser for outdoor education at the planning stage, before a contract is agreed with any external company.

- Find detailed guidance on the Devon Education Services website at: **www.deseducation.org/outdooreducation** in the section on overseas visits.
- Further advice is available through the Young Explorers Trust at: **www.theyet.org**
- Geography Outdoors: the centre supporting field research, exploration and outdoor learning (formerly the Expedition Advisory Centre) provides information, training and advice to anyone involved in expeditions, field research or outdoor learning in the UK and overseas. See **www.rgs.org** This includes a training course, Overseas Expeditions and Fieldwork, run with LAs.

4.6 Use of commercial, charitable and private facilities

Schools and other establishments make significant use of centres and other facilities managed outside the control of the council. The range of use extends from farm visits to pony trekking centres to the employment of individual specialist staff on an 'as needed' basis to the use of large commercial activity centres and ski tour companies.

It is not feasible for the council to approve commercial, charitable or private facility on a regular and systematic basis. Party leaders should establish whether a centre:

- meets the standards of the Adventure Activity Licensing Service, where applicable
- complies with the provider standards expected by the council, see Form SOE5.

The *Activity Centres (Young Persons' Safety) Act 1995* applies to many centres and in particular to centres in the UK which offer the adventurous activities listed below to young people under the age of 18.

- Caving - other than underground passages principally used as show places open to the public.
- Climbing - except on purpose designed walls or towers.
- Trekking - including walking, pony trekking and mountain biking in moor or mountain country which is remote, for example over 30 minutes walking time from road or refuge.
- Watersports - canoeing, rafting and sailing when carried out on the sea, tidal waters or large, non-placid inland waters.

To check whether a centre is licensed by the Adventure Activities Licensing Service visit www.aals.org.uk or phone 02920 755715.

On an annual basis, the council asks local providers of outdoor education, visits and off-site activities to confirm that they comply with expected standards listed on Form SOE5. Those which are contacted and meet these standards will be listed on Evolve at www.devonvisits.org.uk

If party leaders plan to use other providers in this country or abroad they should use Form SOE5 to confirm the provider meets these standards. These points should be considered when referring to these standards.

- Form SOE5 should be sent to the provider when making a provisional booking and no deposits should be committed prior to its satisfactory completion and return.
- The satisfactory completion of the form does not necessarily signify that the service on offer will be appropriate for the young people from your establishment. A pre-visit to the centre and references from previous users or both will help you to decide if the centre will provide the right service, taking into account the age, abilities and needs of your particular group. It is important to establish whether a course of activities and experiences can be negotiated and designed to give a proper learning progression throughout the programme for your group.
- The school is recommended to contact the adviser for outdoor education, if the party leader has doubts following a centre's failure to answer the questions satisfactorily.
- It is important to distinguish between the role of a group leader (from the school) and that of an instructor. See Section 1.6 on Terminology.
- The aims and purposes of the venture should be agreed between the party leader and the provider.

- The group leader or other staff should, where possible, be available to support the instructor during the activity and at periods between activities, such as lunch breaks.
- A list of names must be provided by the party leader to the provider where a residential stay is involved. This should include other relevant information such as medical and dietary needs.

4.7 Outdoor and adventurous activities

Outdoor and adventurous activities may not necessarily require specific qualifications but will need teachers and other staff to exercise professional judgement. Staff should also know general requirements regarding what young people should be taught to ensure safe practice. This includes how to lift, carry, place and use equipment safely and how to warm up and recover from exercise.

Young people should be taught to take increasing responsibility for their own and others' safety. This may include particular hazards in school grounds, surfaces, school traffic, systems of recall and avoiding falls during specific activities.

In principle the guidance in this booklet follows that provided by individual national governing bodies. However, in some cases National Governing Bodies (NGB) guidance has been adapted to take account of the role of staff supervising activities, rather than carrying out a coaching role.

Leaders planning to undertake activities which are not listed below should comply with national governing body guidance, where it exists, and, where necessary, seek additional advice from the adviser for outdoor education. Where activities are carried out as part of a programme of physical education leaders should see guidance provided by the adviser for physical education on www.deseducation.org or contact 01392 384862.

4.71 Register of approved leaders for outdoor activities

Devon County Council, and on behalf of Torbay Council, maintains a summary register of employees and volunteers working under the auspices of each council qualified to lead potentially hazardous outdoor pursuits. For most activities individuals are registered at one of four levels. This system is being superseded by the web-based visits management system Evolve which will allow individual qualifications to be scanned and recorded. This reflects the increasing variety of records of competence and the obligation on the individual to keep their qualifications up to date.

Level 4 Leader	the basic leadership requirement
Level 3 Leader	an improved leadership award
Level 2 Leader	an intermediate leadership award
Level 1 Leader	an advanced leadership award

This four level system operates for the activities listed below. For each level individuals are recognised as competent within the terms of reference of their award. For activities indicated with a * there are fewer levels.

Most of the recognised awards are those provided by National Governing Bodies. All group leaders engaged in these activities are required to be assessed as competent and

registered. Evidence of recent experience may be a requirement for registration. In exceptional circumstances an appropriately qualified technical adviser may endorse the competence of an individual to operate outside the matrices shown. Where this is the case the arrangement should also be agreed with the adviser for outdoor education.

Outdoor and adventurous activities for which there is a system of registration for qualified staff

The letter code refers to the Devon County Council outdoor pursuits register and the associated code is given on individuals' green cards.

Land Based Activities	Code	Water Based Activities	Code
Camping	B	Windsurfing	A
Caving	D	Canoeing and Kayaking	C
Cycling	F	Coastal and Off-shore Cruising	S
Mountain and Moorland Activities	H	Sailing	K
Orienteering	R	Snorkelling and Sub-Aqua	M
Rock Climbing	E	Surfing	N
Skiing	L	Power and Safety Boat	Q
Leadership for Off-site Activities	Y		
Educational Visits Co-ordinator:			Z

Green Cards

For each of these activities green cards are issued to registered leaders, giving details of the activities, and the level, for which the holder is qualified to lead groups. These details are held on the outdoor pursuits data base. Leaders should check that the details on their green card are correct and up to date. Any administrative amendments should be notified using form SOE 2.

This record of registered leaders does not include any checks relating to child protection through the Criminal Records Bureau. It is each establishment's responsibility to ensure that appropriate checks have been carried out for employees and volunteers (see 3.3).

In cases where staff move into the LA or gain qualifications through externally run courses, form SOE 2 should be used for additions and amendments to the register. An assessment may be requested. In exceptional circumstances notification of previous experience, endorsed by suitable referees, will be sufficient for immediate registration.

Log books

Activity leaders should keep qualifications up to date and maintained with recent personal experience. They should keep a record of their experience in activities they undertake as a participant or leader. This may take the form of an NGB log book. This record helps to demonstrate the extent to which a leader has maintained a qualification with practical experience. This record should also be available, on request, to a head or EVC to demonstrate recent and appropriate experience in seeking to gain approval to lead particular activities.

4.72 Land based activities

Camping

Introduction

Camping is a particularly rich activity in the variety of positive educational experiences it offers. It does however require considerable organisation. It may involve large scale multi-day standing camps, single overnight remote backpacking expeditions, a bivouac or may be carried out in conjunction with other activities such as canoeing or cycling.

It is an activity which offers ready access to stimulating areas working in close co-operation with others with great freedom and flexibility. As such it requires purposeful planning for that freedom to be safely enjoyed by all.

Activity leader competence: camping

Hazard level	Group instructor or leader	Code
Coastal and countryside locations (Use of stoves managed by staff)	Relevant experience	
Coastal and countryside locations (Use of stoves managed by group)	Coastal and Countryside Camping Endorsement or Level 2 Award in Basic Expedition Leadership or Summer Moorland Camping Leader or Walking Group Leader Award	B4
Moorland terrain (summer)	Summer Moorland Camping Leader or Walking Group Leader with moorland camping endorsement	H3
Moorland terrain (winter)	Summer Moorland Camping Leader and Winter Day Walking or Walking Group Leader with moorland camping endorsement	H2
Mountain terrain	Summer Mountain Leader Award	H1

The Coastal and Countryside Leadership Award is a regional qualification managed by the South West Mountain and Moorland Leader Training Committee. The course incorporates map reading, clothing and equipment, group management and leadership in coastal and countryside environments. There is an optional camping endorsement to this award.

The Award in Basic Expedition Leadership (ABEL) (previously BELA) is equivalent to the Coastal and Countryside Leadership Award. Note that from September 2007 MLTUK have withdrawn support to Sports Leader UK for this award due to concerns about moderation procedures for post September 2007 assessments.

Recommended staffing ratios

- A minimum of 1:12 is recommended. Additional adults with appropriate experience may extend this ratio, subject to risk assessment by the leader.

- Mixed parties will generally be supervised by staff of both sexes. However, discretion may be exercised regarding the remote supervision of expeditions in which case the head must give their specific approval.
- Large groups may need to be supervised in smaller units.

Additional controls and safety factors

- The suitability and condition of equipment should be checked prior to departure and on return.
- Leaders should teach basic camp skills, such as use of stoves, prior to a camp.
- Access and permission arrangements need to be established..
- The site should be left in a condition as near as possible to that in which it was found.
- The use of candles should be discouraged. If they are to be used their safe use should be discussed.
- Group members may need to be shown how to plan menus and cook. A satisfactory diet is important for morale and safety.
- It is the leaders responsibility to ensure a good standard of hygiene. All group members should be aware of washing areas, toilet areas, water collection points and rubbish disposal and related environmental considerations.
- A set of camp rules should be considered which might include activities near tents, tidiness and noise. Hazards within the area of the camp should be identified.

Stoves and cooking

- Stoves are potentially hazardous. Accidents have occurred from their mis-use, particularly when re-fuelling.
- Gas canisters should be changed well away from any flame and should not be changed in tents. If gaz type stoves are used they should have a re-sealable valve outlet.
- The Trangia meths burner unit should be re-fuelled with a purpose designed container, such as the Trangia safety fuel bottle. Do not use the plastic containers in which the meths may have been sold. The use of a second, exchange burner unit will minimise risks for younger or inexperienced individuals. The Trangia burner must be extinguished and cool prior to refuelling.
- Discuss the design, use and siting of stoves and practice their use in daylight conditions, prior to the expedition if individuals have no previous experience.
- Each person should receive training in using stoves and have their competence assessed.
- Individuals should be taught how to deal with flare ups.
- Mark fuel containers. Store them in the shade in a cool area.
- Young people should not use stoves fuelled by petrol.
- Cooking should be done outside and away from tents.
- If experienced individuals are cooking in tent doorways a knife to cut the tent or second exit must be available.
- Standing camps will normally have separate kitchen tents.

Recommended stoves for light weight camping and expeditions are:

- Trangia-type methylated spirit stoves, with care needed on refuelling and careful storage of fuel
- gas stoves with a re-sealable valve outlet using propane and butane gas mix.

Training opportunities and additional information

- Sports Leaders UK – they administer the Level 2 Award in Basic Expedition Leadership (ABEL) www.sportsleaders.org

Caving

Introduction

Caving is the exploration of natural and sometimes mined underground systems and a primary motive should be the desire to learn about such places. Devon has a variety of cave systems particularly centred around the limestone of the Buckfastleigh area. The caves of the Mendip Hills provide a nearby extension to these opportunities, for those qualified to lead groups in this area. Groups must abide by current access agreements.

Activity leader competence: caving

Hazard level	Group instructor or leader	Code
Show caves and tourist mines in public areas	Relevant experience	
Cave and mine systems without pitches or technical difficulty.	BCA Local Cave and Mine Leader Award Level 1 (Includes use of simple belays and handlines)	D3
Cave and mine systems with pitches < 18m.	BCA Local Cave and Mine Leader Award Level 2	D2
Cave and mine systems with pitches > 18m	BCA Cave Instructor Certificate	D1

Candidates may have their certificates endorsed specifying only named caves that they can use. Some activity centres may use instructors who hold a local award endorsed by a technical adviser to lead groups of young people in specified caves. Awards are valid for three years and may be re-validated by the BCA for a further three years.

Recommended staffing ratios

- For caves with no technical difficulty and no wet sections one qualified instructor who holds a minimum of the LCMLA Level 1 may lead groups of up to 12 students. A second responsible adult, who has previous experience of the cave, should accompany the group.
- For more technical caves the number in the party should not exceed a ratio of 1 qualified leader to 6 students. Each party should have an assistant or second member of staff.
- The minimum party size should be four. Group size should be small both for mobility underground and so that each person is able to be an integral member of the group.

Additional controls and safety factors

- The leader should have previous experience of the caves that groups are taken in to and associated access and accident procedures.
- Mines present particular hazards which require more detailed background information prior to any visit, in terms of false floors, stacked waste rock, unsafe timbering, deep water and structural instability. The possibility of poisonous gases and discarded materials should also be considered. Radon hazards in mines in the West Country are particularly significant. Visits to mines must be considered in the light of currently available radon readings.
- The leader should be familiar with current information related to radon hazards in mines or caves which are used.
- Leaders should set examples and impress upon their parties the need for conservation in caves. The principle of minimum impact, when to avoid caves, care of stalagmites, removal of any litter and care for the local flora and fauna should form part of an all round education in cave conservation.
- Each caver should have adequate warm clothing with protective outer garment, a helmet conforming to British Standard with 'Y' chin strap and lamp bracket, an efficient head lamp and suitable footwear such as wellingtons or stout boots without hook lacings.
- Group equipment should include emergency food, spare lighting, a first aid kit, knife and whistle. A group shelter sufficient for all members of the group should be carried, or individual bivi-bags. Additional equipment should be considered as appropriate to the trip including life-lines when there is danger of a fall.
- The group leader should be sensitive to the physical and psychological condition of all group members and have an established system of communication within the group.
- Information about the proposed trip should be left with a responsible adult who will be clear about emergency procedures in the event of the group not returning. An indication of the groups' presence in the cave should be left at the cave entrance.
- Preparation may need to include surface training and should include a briefing and equipment checks.
- A weather forecast should be obtained for any cave in which there is any danger of flooding.
- The group leader should identify any medical conditions within the group prior to the activity.

Training opportunities and additional information

- The National Governing Body for caving is the British Caving Association.
<http://british-caving.org.uk/>
- *The Local Cave and Mine Leader Award Assessment Handbook* provides detailed background to the scheme and is available from the BCA website.

Cycling

Introduction

The local area has an extensive road network and a wide range of off-road cycle routes and bridleways. Cycling provides great opportunities for independent journeying. An awareness of traffic hazards on all roads and how to avoid such hazards must, however, be a priority. Environmental damage and erosion is a major concern, particularly on

Dartmoor and should be kept to a minimum. Respect should always be shown to other users of the countryside.

Activity leader competence: cycling

Hazard level	Group instructor or leader	Code
On road	Relevant experience in cycling <i>or</i> BSCA Award <i>or</i> OTC Road Leader <i>or</i> Devon Cycle Instructor course	Level 4 (F4)
Off road cycling. On cycle tracks and lanes – trail riding. <i>Public highways, cycleways, forestry tracks and non technical routes no further than a 30 minute walk from a refuge or accessible road.</i>	Relevant Experience in cycling <i>or</i> OTC Trail Mountain Bike Leader <i>or</i> Pinkery Centre Mountain bike leaders course <i>or</i> Devon Discovery Trail Leader award <i>or</i> Devon Cycle Instructor course. <i>and</i> The relevant on foot award may be needed such as Coastal and Countryside Leader or equivalent experience.	Level 3 (F3)
Off road cycling. <i>Cycle routes, bridle way or other non technical routes in open country more than a 30 minute walk from a refuge or accessible road.</i>	Relevant Experience in cycling; <i>or</i> OTC Trail Mountain bike Leader; <i>or</i> Pinkery Centre Mountain bike leaders course; <i>or</i> Devon Discovery Trail Leader award <i>and</i> The relevant on foot award is required such as Summer Moorland Walking Leader	Level 2 (F2)
Off road journeys involving technical sections.	OTC Technical Mountain Bike Leader <i>or</i> Pinkery Centre Mountain Bike Leaders course. NB. The relevant on foot award may be required such as Summer Moorland Walking Leader	Level 1 (F1)

Cycling on roads presents additional risks. The danger from traffic is an increasing problem, even on quiet country lanes. Leaders are encouraged to use dedicated cycle ways wherever possible and may consider transporting bikes to cycle way venues, or hiring on site.

Where a leader does not hold a recognised national governing body award, they must be able to demonstrate competence to lead the activity at the particular hazard level. Leaders must take into account the remoteness of the terrain, as well as the technical nature of the route chosen. All leaders are encouraged to hold an award or attend a relevant training course.

Leaders should hold a current first aid certificate.

Recommended minimum staffing ratios

- 1:10. This may need to be improved, informed by risk assessment and with particular regard to terrain, hazards, group age and experience.
- Large groups may need to be split.
- There should be an assistant leader if group members have limited previous experience of riding in groups or on roads.

Additional controls and safety factors

- Helmets should be worn when cycling on and off road.
- Groups should practice in a safe area to ensure they can control their bikes properly.
- Leaders should ensure group members understand correct behaviour and are aware of dangers en-route.
- Uncontrolled descents and blind corners present particular hazards on even the most minor roads.
- Cycle in single file on roads.
- Particular care should be taken on unstable or wet surfaces.
- Leaders should have experience of both cycling and basic cycle maintenance.
- Cycles should be checked for roadworthiness, particularly brakes, tyres and lights.
- Reflective materials on clothes or cycles greatly increase the visibility other road users have of cyclists.
- Cyclists should be proficient and have appropriate knowledge of the Highway Code.
- Access may need to be negotiated when cycling off roads. Cyclists have a right of way along public bridleways but not along public paths.

Training opportunities and additional information

- Devon County Council provides one day cycle instructor courses through the Road Safety and Travel Awareness Team.
www.devon.gov.uk/cyclists
- Devon Discovery provides trail leader awards.

Other training organisations include:

- MIAS: Mountain-bike Instructors Award Scheme
www.mountainbikeinstruction.co.uk
- BOB British Off-road Biking www.britishoffroadbiking.co.uk
- Details of current awards in cycling leadership can be found on the Adventure Activities Licensing Service web site www.aals.org.uk

Fishing

Introduction

Leaders should exercise supervision appropriate to the expertise and self-reliance of the participants and with regard to prevailing conditions. They should brief group members about potential hazards such as crumbling rocks, tides, shingle, unexpected large waves, slippery rocks, casting dangers and the dangers of being washed into the sea, bearing in

mind a safety margin.

Activity leader competence: fishing

All leaders should be competent to assess the risks of the proposed activity, based on the factors listed below. Recognised fishing areas should normally be used.

Hazard level	Group instructor or leader
Recognised inland fishing areas	Relevant fishing experience and proficient in first aid, life-saving and rescue as appropriate
Coastal fishing areas	Relevant fishing experience and proficient in first aid, life-saving and rescue as appropriate
Sea fishing from a private boat	Relevant fishing experience and proficient in first aid, life-saving and rescue as appropriate. Power boat handling award, such as RYA Level 2 or higher
Sea fishing from a commercial boat	Recognised licensed provider

Staffing ratio

- A minimum ratio of 1:10 is recommended inland.
- A minimum ratio of 1:6 is recommended on the coast.
- Many circumstances will require an improved staffing ratio, informed by risk assessment.

Additional controls and safety factors

- Group leaders are encouraged to undertake a training course recognised by the Angling Development Board, such as Level 1: Certificate to Assist in the Coaching of Angling or Level 2: Certificate to Coach Angling.
- Personal clothing and equipment should be appropriate to the environment and weather conditions.
- Wet rocks are slippery and potentially dangerous. Attention should be paid to adequate footwear, for example boots with studded soles. Rubber-soled footwear is potentially dangerous.
- A lifejacket or buoyancy aid should be worn when fishing from rocks.
- A rescue rope or line throwing buoy should be available when fishing from rocks and the leader should be competent to use it.
- Leaders should consult tide tables, if applicable, and be familiar with prevailing conditions.
- Leaders should have local knowledge of the water and access arrangements and be aware of seasonal limitations.
- Elementary weather signs such as wind strength, wind directions, cloud and formations should be monitored as the weather affects tidal conditions.
- Leaders should be proficient in life-saving and resuscitation and aware of the causes and treatment of hypothermia.
- There should be a competent first aider present, who has the ability to instruct others in how to remove fish-hooks from flesh. If this happens an anti-tetanus injection may be needed.

- Wading in fast or unfamiliar waters can be dangerous. Only wade when the bottom can be seen and risks have been carefully assessed.
- The leader should carry a whistle for recalling group members.
- Group leaders should brief participants about appropriate environmental considerations and conservation practices, including a 'catch and return' policy. Anglers should be aware of other people when using hooks and weights.
- Leave details of your programme with an emergency contact who can act if you are overdue.

Sea fishing from a boat

When a private or hired boat is being used the leader or skipper must be qualified in safety and power boat handling or equivalent, and all members of the party must wear an appropriate personal flotation device (buoyancy aid or lifejacket). The boat must be fit for purpose and carry appropriate equipment. This could include; a life raft, radio, flares, first aid kit, additional anchors, water, shelter and spare clothing. The leader must have an established emergency action plan, and it may be advisable to notify the coastguard.

For commercial boats, the skipper and the boat must both be licensed by the local authority, and must comply with the Maritime and Coastguard Agency relevant Code of Practice Certification. The skipper must hold a Commercial Endorsement. The skipper should brief the participants on behaviour and safety points.

Training opportunities and additional information

- Details of the coach licensing scheme of the Angling Development Board which includes; The National Federation of Anglers, The National Federation of Sea Anglers and the Salmon and Trout Association can be found at:
www.fishcoach.org
The qualifications can be taken part-time or full-time at schools, colleges, universities or sports clubs.
- The National Federation of Sea Anglers: www.nfsa.org.uk
- The National Federation of Anglers: www.nfadirect.com

Information about commercial boats can be found on the RYA web site: www.rya.org.uk or the Maritime and Coastguard Agency web site: www.mcga.gov.uk

Horse riding and pony trekking

Activity leader competence: horse riding and pony trekking

Hazard level	Group instructor or leader
Riding school	Establishment is recognised by the British Horse Society (BHS)
Trekking - countryside or moorland fringe	Established trekking centre with local authority licence and staff with relevant experience
Trekking – more than 30 minutes walk from road or refuge	Establishment is licensed with the Adventure Activity Licensing Service

Party leaders planning to use riding or trekking centres should ensure that the centre has a current licence issued by the local authority which requires a building inspection, veterinary inspection and evidence of insurance.

Additional controls and safety factors

Riding

- Recognition by the Association of British Riding Schools (ABRS) or BHS provides a guide to the standards to be expected of riding schools when instruction is being considered. In addition, a number of centres have particular experience and qualifications connected to work with special needs groups.
- For all groups, suitable clothing must be worn including well-fitting headgear to current BSI standard and footwear with low, hard heels.
- The numbers of riders per escort must not exceed safe limits; six is reasonable.

Pony trekking

- This activity allows access to a great deal of hilly and scenic terrain. It may involve some time in the saddle and preliminary riding instruction is advisable.
- Weather conditions and terrain may make protective clothing necessary.
- Small groups are desirable for pony trekking. They should be accompanied by two adults who are experienced in instructing, leading and assisting treks, have an elementary knowledge of first aid and local knowledge of riding routes.

Training opportunities and additional information:

Approval by one of the following organisations ensures the establishment has been inspected and found to meet certain minimum standards:

- the Association of British Riding Schools <http://www.abrs-info.org/>
- British Horse Society: www.bhs.org.uk
- Ponies Association (UK): www.poniesuk.org
- Riding for the Disabled Association: www.riding-for-disabled.org.uk

The BHS Stage II provides an indication of minimum competence but is not a requirement for an escort.

Mountain and moorland activities

(Also see Coastal and countryside activities Section 4.22)

Activity leader competence: walking (also see camping)

Hazard level	Group instructor or leader	Code
Coastal and countryside areas	Relevant experience or Coastal and Countryside Course or Award in Basic Expedition Leadership (ABEL)	B4
Moorland fringe less than 30 minutes walk from road or refuge	Relevant experience or as above	B4
Moorland in summer conditions more than 30 minutes from road or refuge	Summer Moorland Walking Leader or Walking Group Leader	H4

Moorland in summer conditions - including camping on the open moor	Summer Moorland Camping Leader or Walking Group Leader with moorland camping endorsement	H3
Moorland in winter conditions	Winter Moorland Walking Leader or Walking Group Leader	W4
Mountain terrain in summer conditions- including scrambling	Mountain Leader Award - summer	H1
Mountain terrain in winter conditions	Mountain Leader Award - winter	
Mountain terrain abroad	Mountain Leader Award or International Mountain Leader Award	

Summer moorland conditions are typically fair weather days, but may have cold winds, rain and low temperatures which have not been forecast and can be a hazard, so the leader and the party should be prepared for this. Winter moorland conditions exist when there is snow and or ice under foot or forecast irrespective of the time of the year, and also includes a combination of rain, cold winds and low temperatures.

All moorland leaders must have done a minimum of six hours formal first aid training in the last three years with an HSE approved provider.

Recommended staffing ratios

- One qualified leader to 15 group members is recommended as a minimum.
- It is preferable to have two adults accompanying a group.
- In a mountain environment an improved ratio is required, based on risk assessment.
- Large parties are difficult to manage.
- The minimum recommended group size is four.

Additional controls and safety factors

- The responsibilities and leadership skills needed for a group on the moors or in the mountains call for a broad base of knowledge and experience. This is particularly the case where there are severe weather conditions, navigational difficulties or where an unexpected incident occurs.
- The leader needs to be aware of symptoms of hypothermia and hyperthermia and how they may be prevented or dealt with.
- The leader should be familiar with accident procedures, individual and group equipment needs and the hazards involved in crossing swollen streams or rivers.
- The speed of the group should be governed by the slowest member.
- The minimum equipment the leader will generally need is; waterproofs, map and compass, whistle, torch, survival bag, first aid kit, hat and gloves, spare clothing and emergency rations and a mobile phone. Many of these should also be carried by group members, depending on the group and the route being taken.
- The mountain and moorland environment in winter conditions should not be underestimated. Fitness and stamina is needed as well as sound judgement and navigational ability.
- The leader should get a local weather forecast before departure.

- The leader should leave details of the route the group intends to take at base or with a responsible adult, together with instructions of the action to take if the party is late.
- The leader needs to be aware of access and conservation issues in the area they are visiting.

Ten Tors

The required minimum level of approval for staff managing Ten Tors training is the Summer Moorland Camping Leader. However, staff leading Ten Tors groups in wintry conditions will need this award plus the Winter Moorland Walking Leader Award or Summer Mountain Leader Award. Particular attention should be paid to how prepared groups are which will be supervised remotely, even in reasonable weather conditions (see Section 3.17: Remote supervision).

Managers must attend the Ten Tors training weekend as required by the organisers. All members of staff should be aware of current good practice in terms of leadership, hypothermia and hyperthermia, water hazards, access, clothing and equipment.

Training opportunities and additional information

- Mountain Leader Training England: www.mlte.org
- The MLTE has produced a booklet providing best practice in the remote supervision of groups. www.mlte.org
- *Hillwalking: The Official Handbook of the Mountain Leader and Walking Group Leader Schemes* from MLTUK.
- The South West Mountain and Moorland Leader Training Scheme covers the moorland areas of the South West and the Brecon Beacons, excluding exposed ridges, gullies and steep ground. The South West Mountain and Moorland Leader Training Scheme Syllabus is at: www.deseducation.org/outdooreducation
- Devon Discovery provides training and assessment programmes for the South West Scheme and Walking Group Leaders' Award. www.devon.gov.uk/devondiscovery
- Sports Leaders UK administers the Level 2 Award in Basic Expedition Leadership (ABEL) www.sportsleaders.org
- Dartmoor National Park: www.dartmoor-npa.gov.uk/
- Exmoor National Park: www.exmoor-nationalpark.gov.uk
- Met Office: www.metoffice.gov.uk

- Weathercall South-West fax: 09065 300 129

Orienteering

Introduction

Orienteering is a sport which blends navigational and physical skills. It is not especially hazardous, but it is an all year round activity and accidents may occur in places where medical attention is not immediately available. In the nature of orienteering young people will typically be supervised on a remote basis and this should be considered in the risk assessment. Group leaders taking parties to organised events should have had first hand experience of the sport.

Activity leader competence: orienteering

Hazard level	Group instructor or leader	Code
School sites and adjacent locations	Relevant experience or British Orienteering Federation Young Leader Award	
Parkland and permanent courses	Relevant experience or British Orienteering Federation Level 1	R1
Organised event	Relevant experience with support from club members or British Orienteering Federation Level 1	R1
Moorland fringe less than 30 minutes walk from road or refuge	Relevant experience or British Orienteering Federation Level 2	R2
Moorland in summer	British Orienteering Federation Level 3 or Summer Moorland Walking Leader	R3

Recommended staffing ratios

- An organised British Orienteering event, where additional supervision is on hand, will need different support to that which is needed to manage a training session with no outside assistance.
- For training and teaching sessions a minimum ratio of 1:15 is recommended. For most groups this ratio will need to be improved depending on the complexity of the terrain, the experience and age of the group and the extent of boundary collecting features.
- At an organised event a minimum ratio of 1:15 is recommended for participating groups - allowing adequate preparation for competitors the group leader is responsible for.
- Experienced parents and other adult helpers may help with supervision.

Additional controls and safety factors

- Full leg and arm cover should be worn.
- Clothing should give adequate protection against cold, wind and rain, especially in exposed locations.
- A whistle should be carried and individuals instructed in its use and misuse.
- Orienteering skills should be taught in clear and easy stages, with adequate opportunity for individuals to get to know the map. Courses should encourage a sense of success not failure and should involve safety strategies for novices to limit the effects of navigational errors.
- Out of bounds areas should be clearly defined and reference made to any particular local hazards.
- Leaders should stress the importance of reporting to the finish and of handing in control cards for all competitors, whether they complete a course or retire.
- A time limit may need to be set which individuals must return to base by, allowing a margin of time if an initial search is needed.
- Instructions should be given to novices about what to do if they become lost.
- For activities, perhaps using permanent courses, for novices or young participants it is appropriate for young people to work in pairs or threes.

- Competitive orienteering generally involves individuals travelling alone through the woodland, countryside or, less commonly, urban event area. The party leader should be aware of the slight risk of interference from the public.

Training and coaching opportunities and additional information

- British Orienteering Federation: www.britishorienteering.org.uk
- Find details of local club events at: www.devonorienteering.co.uk/
- Find details of local permanent orienteering courses at: www.orienteeringindevon.org.uk
- Find coaching details at: www.britishorienteering.org.uk/developing/award-scheme.php

Paintballing

A number of schools, colleges and youth groups have considered taking part in paintballing. Please note that paintballing is not recommended as an educational activity. Further guidance is on: www.deseducation.org/outdooreducation

Rock climbing

Introduction

This activity covers rock climbing, the use of climbing walls and abseiling.

Activity leader competence: climbing

Hazard level	Group instructor or leader	Code
Climbing walls - local and school based climbing walls	Devon County Council Climbing Wall Supervisor Or Module 1 of the Climbing Wall Award (MLTE)	E4 or E4w
Climbing walls - commercial or privately run	Devon County Council Climbing Wall Supervisor Or Module 1 of the Climbing Wall Award (MLTE) Or Modules 1 and 2 of the Climbing Wall Award (MLTE), depending on local requirements	E4 or E4w Or E3
Single pitch crags less than 30 minutes from road or refuge - non-tidal	Single Pitch Award (MLTE)	E3
Single pitch crags less than 30 minutes from road or refuge - tidal	Single Pitch Award (SPA) and risk assessment for the site regarding tides	E3
Multi-pitch climbing	SPA and local assessment or Mountain Instructor's Award (MIA)	E1
Single or multi-pitch climbing more than 30 minutes from road or refuge	Summer Mountain Leader and SPA and local assessment or MIA	E1

Within Devon and Torbay a local, limited system of approval for climbing walls complements the national SPA and more advanced awards of the MLTE. The SPA covers;

rope management, choice and use of equipment, the selection and use of belays, techniques of belaying, group supervision and instruction, emergency procedures, conservation and access issues, background to the activity and ethics of climbing.

Climbing walls

Climbing walls complement opportunities to climb on natural crags and boulders and offer new opportunities for teaching and practice. They may incorporate artificial structures adapted for climbing.

Additional controls and safety factors on climbing walls

- Other than low walls only used for traversing, climbing walls should only be used under the supervision of an individual with the appropriate qualification, : Devon Climbing Wall Supervisor or Single Pitch Award depending on the complexity of the wall and local conditions of use.
- Instructors should follow recognised practice and conform to conditions of use at individual climbing walls, including use of helmets and other equipment where recommended.
- There should be a progressive programme of training, allowing students to develop and master the skills of belaying in low risk situations, before they take greater responsibility for other students when peer or team belaying on the wall.
- As a guide, we recommend that for teaching, one supervisor should oversee no more than five active ropes. However, this must be informed by local risk assessment. A qualified member of staff supervising the group must be able to intervene quickly and effectively if they need to. Young people with less experience in peer belaying will need closer supervision.
- Belay methods need to be appropriate to the group's level of experience. For most students a second belayer 'tailing' the rope (holding the rope and acting as an alert back up to the belayer) is essential.
- Equipment should be of the same standard as for other forms of climbing.
- On council property the design of artificial walls must be approved. The head of the establishment should ensure that any wall fixtures, particularly anchor points, are inspected regularly and the inspections recorded. A prominent notice should be displayed to the effect of, 'Do not use this wall without permission'.
- The recommended system of monitoring and inspecting the climbing wall is:
 - limited visual inspection by teachers or climbing wall supervisors each time the wall is used
 - formal and recorded visual inspection by wall managers, perhaps monthly or every three months depending on use
 - structural inspection, every two years, depending on levels of use and informed by risk assessment

Community use of climbing walls

- Participants should be informed about the risks of climbing and should confirm that they are aware of, and consent to, those risks.
- Suitable arrangements must be in place to supervise community use of the climbing wall where young people under the age of 18 take part.

Recommended staffing ratio for use of natural crags

- This will depend on the level and purpose of the session and the experience of the participants.

- An introductory session will be difficult to manage if the ratio exceeds 1:8.
- On multi-pitch climbs 1:2 is a minimum recommended ratio.

Additional controls and safety factors for natural crags

- Rock climbing with young people should be introduced in easy stages, allowing for an early appreciation of basic skills and procedures.
- Where appropriate, beginners should experience the effects of holding another climber on a rope and of being held themselves.
- A safety rope should be used when abseiling.
- Approved protective helmets should be worn.
- The use of equipment should be monitored each session and throughout the year.
- There should be a systematic approach to checking and maintaining equipment, informed by manufacturers' guidance. Records should be kept of important safety checks, and any equipment showing undue signs of wear should be discarded.
- All climbing equipment should carry the CE standard.

Training opportunities and additional information

- Find more information about training and assessment opportunities at: www.deseducation.org/outdooreducation
- The MLTE is introducing a climbing wall award in 2008. This will be a national award, complementing the more limited form of training and accreditation provided through the local scheme and covering a wider variety of venues. See www.mlte.org
- The MLTE also provides site specific *Climbing Wall Guidance Notes* which have informed the development of the local scheme.
- The Adventure Activities Licensing Service has guidance on peer and team belaying at: www.aals.org.uk/guidance_details.php/pArticleHeadingID=155
- Guidance on selecting, using and caring for equipment is in the British mountaineering Council (BMC) pamphlets on equipment at: www.thebmc.co.uk
- The leader should have a clear understanding of environmental and access issues in general and those relating to using individual areas. Guide books, the BMC pamphlet *Tread Lightly* and the Countryside Code provide background information. See www.thebmc.co.uk
- See BMC club guidance notes for information on community use of climbing walls and other club based information: www.thebmc.co.uk

For information on monitoring and inspecting climbing walls see www.deseducation.org/outdooreducation in Supplementary Guidance.

Traversing walls

Traversing walls encourage balance, co-ordination and movement in curriculum time or as part of lunch-time and break time activities. Using some or all of the holds young people may set themselves challenges appropriate to their own ability. As the name implies, traversing walls are designed to allow movement along, rather than up, the wall. A traversing wall does not need specialist climbing equipment or specially qualified supervisors; it provides 'low level' climbing.

- Follow manufacturer's guidance for fitting holds. Extra holes may be drilled and sleeves fitted, to allow swapping and movement of holds.
- Provide holds of different colours, sizes, shapes and locations.

- Risk assess the location of the wall:
 - consider the surface at the foot of the wall and ensure there are no obstacles such as drains or kerb edges which young people are likely to step down onto awkwardly
 - consider the location in terms of any immediately adjacent activities
 - a protective surface should generally be considered where the highest footholds are more than 600mm off the ground - protective surfacing is not a legal requirement but should be considered as part of your risk assessment for the wall and its use
 - consider ease of supervision and observation for things like lunchtime use.
- Check the holds on a regular basis to see if any have become loose, and tighten where necessary. Ask group members to report any loose holds.
- Young people should be informed about good practice (and may be able to draw up their own code of practice) including:
 - give people on the wall time and space to move on
 - don't stand immediately behind or directly below someone who is on the wall
 - be considerate towards other people on the wall
 - use sensible footwear.

Snow sports, including skiing, snowboarding and tobogganing

Introduction

Party leaders should be aware of the educational opportunities presented by a snow sport course in this country or abroad and how they may be realised. The residential element of a course creates significant additional responsibilities which need preparation, planning and adequate supervision.

Activity leader competence: skiing and snowboarding

Hazard level	Group instructor or leader	Code
Dry slope	Follow procedures at each site	
Course organisation and very limited supervision outside lessons	Snowsport Course Organiser where 4 hours minimum tuition per day is provided by ski instructors	L4
Ski supervision	Alpine Ski Course Leader or equivalent	L3
Ski teaching or instruction	Ski school recognised or British Association of Ski Instructors or Snowsport England Development Coach	L2

As a minimum each party should include one member of staff who has completed the Snowsport Course Organiser Award and has overall or assistant responsibility for managing the programme.

Recommended staffing ratios

- A ratio of one responsible adult or instructor to ten party members is recommended for organising the course. However, some ski schools may reasonably work to a higher ratio in lessons such as a minimum of 1:15.

Use of ski helmets for skiing or snow boarding

From 2006 the Federation International de Ski (FIS) has strongly recommended that all skiers and snowboarders, regardless of ability and age, use helmets. This is also now the council policy for supervised group skiing.

- Helmets should comply with BS/EN 1077/1996 and be correctly fitting and fastened.
- Party leaders must ensure that all skiers in their group are aware that to reduce the likelihood of a head injury they should ski under control and comply with the International Code of Conduct. Skiing recklessly, or at high speed, can lead to serious injury even if a helmet is used.

Additional controls and safety factors

- Accidents will be reduced if the skiers' International Code of Conduct is understood and observed by all party members. Following the skiers' code and skiing safely is the key control measure for reducing the likelihood and severity of injuries when skiing, snowboarding or tobogganing.
- Young people should not be allowed to ski alone or outside marked skiing areas and trails.
- Supervised skiing practice and other snow activities should be carefully monitored.
- Clear instructions should be given to party members about runs, tows and chairlifts and their use, check-in and return times and rendezvous points. Reference should be made to local and general safety precautions and accident procedures. A piste map for party members will help.
- Snow sports are physically demanding and need endurance, strength and mobility. Preparation is essential and a programme of pre-ski exercises and fitness training should be undertaken before any trip.
- Artificial ski slope practice is invaluable as a part of this preparation, and planned visits under the direction of a qualified instructor are recommended.
- The party leader should be confident of the instruction given to individuals under tuition. Discussion with the travel company representative or their equivalent may overcome unexpected difficulties.
- Instruction should be given in the safe carrying and handling of equipment.
- The group should be properly clothed and equipped for snow, wind and low temperatures.
- Equipment should be of an acceptable standard and appropriate to each individual. Skis must be fitted with adjustable release bindings and ski brakes. The basic principle of the ski binding mechanism should be explained to party members when fitting, enabling them to identify and report faults. Bindings must be adjusted to suit the weight and physical condition of each skier and should only be altered by appropriately skilled technicians. Party members should check with instructors or staff if there are problems with equipment.
- The use of knee protection, wrist guards, and helmets is recommended for snow boarding. The use of helmets is recommended for skiing.
- Group members must be taught by qualified instructors, who are members or employees of a local ski school or who hold a BASI qualification, minimum Grade 3.

Supervision of snow sports

Group leaders should arrange for a minimum of four hours ski school tuition (two sessions) per day. Members of staff who hold the Alpine Ski Course Leader award or equivalent may directly supervise their own groups. They must be able to exercise adequate supervision of their group and have knowledge of the skiing area being used.

Other very limited supervision outside lesson time on known terrain where staff and young people are confident of their ability may be carried out by staff who:

- have completed the Snowsport Course Organisers qualification
- have achieved a Snowsport Snowlife Award at Level 6 or above.
- have previous experience of school skiing
- are fit and competent to supervise
- are in sight of their group.

A parents' evening should be held during the planning period. A brochure produced by the party leader for a specific course is recommended to prepare students and inform parents. Important issues are:

- clothing
- agreed standards of behaviour and policies regarding smoking, alcohol, punctuality, care of rooms, responsibilities to others in the resort, the hotel and on the slopes.

Non-skiing activities

Appropriate safety considerations need to be given to non-skiing activities in the event of no snow or for recreation. Where activities are provided by a third party, for example, tobogganing, the party leader should check the safe operation of the activity beforehand. This may include watching the activity taking place, or taking references from other schools that have used the operator. If activities such as tobogganing are provided directly by the school staff, then safe operational procedures should be in place, based on an assessment of the risks involved.

Consideration should be given to:

- choosing a slope with a safe run off at the bottom
- starting young people in small groups from low down the slope initially
- arranging a safe return walking area to the side of the run
- use of gloves, helmets, and other protective equipment as appropriate
- discouraging racing or reckless riding.

Party leaders planning cross-country skiing or ski mountaineering should discuss plans with the adviser for outdoor education.

Skiing artificial slopes

The use of artificial slopes to train for ski courses is encouraged. A minimum staff to student ratio of 1:12 is recommended. Local guidelines and regulations for the use of the slope should be observed. Gloves or mitts should be worn. Loose clothing which may get caught in the tow should not be worn. Where appropriate, the safety procedures stated for skiing should be adhered to.

To instruct skiing on an artificial slope, leaders must hold a minimum of an Artificial Ski Slope Instructor's Certificate or Club Instructor's Award.

Training opportunities and additional information

- The National Governing Body is Snowsport England. Get details of courses at: www.snowsportengland.org.uk
- Party leaders should have access to a copy of the handbook *Going Skiing* from Snowsport England.
- Find information on ski injuries and research at: www.ski-injury.com

Tyrolean traverses and gorge walks, coasteering and other combined water and rock activities

Introduction

Combined water and rock activities are those where hazards associated with a rock environment may at times combine, or alternate with, those of a water environment. It represents a spectrum of activities, which can be reasonably grouped together as in the table below. It should be noted, that other names can be used for the activities, such as canyoning, sea level traversing, ghyll walks, river walks, adventure swimming, river running, coastal exploration, and activities at water margins. Leaders should be aware of the specific content of a programme or proposed activity, and use the table below, together with a specific risk assessment, to guide their planning and level of required leader competence.

Hazard level	Group leader or instructor
Tyrolean traverses These can be improvised, or semi permanent. They can be between trees, over rivers and across gorges	Appropriate life saving and rescue skills and Single Pitch Award and relevant prior experience and training in use of a Tyrolean
Gorge walking - non-technical within the South West	Appropriate life saving and rescue skills and Summer Moorland Leader Award or equivalent
Gorge walking - technical gorges, involving the skills and techniques of a climber, and the use of climbing equipment	Appropriate life saving and rescue skills and Single Pitch Award and Summer Moorland Leader Award or equivalent for sites more than 30 minutes from a road or refuge
Coasteering - bouldering or scrambling above the sea. It may involve swimming in the sea.	Appropriate life saving and rescue skills and Single Pitch Award And training and experience in coasteering on the site used

This guidance from AALS is also relevant for all of these activities:

'Specialised first aid, life saving and/or rescue skills may be necessary. Some of the life saving and rescue skills may be NGB based or developed through in-house training and assessment. It may be appropriate to include scenario-based training at the venues to be used in order to identify the problems as well as the solutions which particular venues may present. First aid considerations will generally include a procedure for re-warming cold participants and should take into consideration the nature of the venue, transport

arrangements etc.’

Additional controls and safety factors for Tyrolean traverses

- Ensure belay points are sound.
- Protect trees used for belays.
- Protect the rope and slings when used round rocks to minimise the cutting potential when pulled into cracks as the rope is tensioned.
- Always use two ropes to set up the Tyrolean, rather than relying on one rope.
- Where the traverse is low, use two static ropes, as if one shears a second dynamic rope will simply dump the person on the ground or in the water with the stretch.
- Avoid using jamming devices in tensioning ropes as these can damage the sheath or tear through the rope.
- As part of the site risk assessment check to see that take off and landing points are appropriate so that banks or cliff edges are not hit on take off and arrival.
- Ensure that clipping on and off can happen without over-reaching by the person on the traverse or staff.
- Ensure good group supervision at cliff edges or water margins.
- Have a throw line available for use near deep or fast flowing water in case any party member falls in.
- Appropriate briefing should be given to group members.

Additional controls and safety factors for combined water and rock activities, including gorge walking and coastering

- Clothing and equipment should be carefully considered. A buoyancy aid should be worn if there is a likelihood of being in the water and wet suits may be required.
- Helmets should be worn.
- The group leader needs to be aware of local conditions, including releases from dams on some rivers, and tides and currents for coastal work.
- Access and exit points need to be considered. Emergency procedures should include alternative exits and escape routes.
- The group leader should carry out a visit to the site, to assess risks and consider the suitability of the site before using it with group members.
- There should be clearly identified cut off points, for river levels, temperature, and tide height, beyond which the activity does not take place.
- Leaders should exercise caution before allowing participants to jump into the water. It may be appropriate for the leader to test the jump and the exit point.
- Leaders should be aware of the effects of cold water, and that someone may panic, and ensure appropriate safeguards are in place.

Training opportunities and additional information

There is no specific National Governing Body for this type of activity. Most of these activities will need a combination of skills and awards.

Get more and guidance from:

- Devon Education Services: www.deseducation.org/outdooreducation
- The British Mountaineering Council: www.thebmc.co.uk
- The Adventure Activities Licensing Service: www.aals.org.uk/guidance_details.php/pArticleHeadingID=79
- Life saving organisations: www.lifesavers.org.uk

Ropes courses

Hazard level	Group leader or instructor
Ropes course – low level participants are not more than a few feet above the ground. This can include assault courses, obstacle courses and initiative exercises	Relevant experience: the group leader should have undergone appropriate training and induction on the course
Ropes course – high level participants are protected by the use of a belay system or ‘cow’s tails’	Devon Climbing Wall Supervisor (E4w) or above and appropriate training and induction on the course

Additional controls and safety factors

- A risk assessment should be carried out by group leaders for any particular ropes course or zip wire, bearing in mind the type of activity concerned and the risk and consequences of falls.
- Suitable clothing should be worn. There are potential dangers from wearing jewellery and not tying back or covering long hair.
- Equipment should be sound and of an adequate standard. Wooden supports, metal hawsers and ropes, tapes, pulleys and other equipment should be inspected regularly for signs of wear and deterioration and a record of inspections maintained.
- The hazards of protruding bolts or nails should be considered and, if necessary, removed.
- The additional risks of competitive events on ropes courses should be borne in mind by party leaders.

Training opportunities and additional information:

There is no National Governing Body for this activity. However, training schemes are offered by various commercial organisations who design and build ropes courses. There is also guidance from HSE and AALS.

Adventure Activities Licensing Service: www.aals.org.uk

Health and Safety Executive: www.hse.gov.uk

Supervision of Ropes Courses, Entertainment Sheet 14

Maintenance of Ropes Courses, Entertainment Sheet 15

4.73 Water based activities

Introduction

The local area provides rich opportunities in the natural environment for young people and adults to participate in a wide variety of water based activities. However, there are obvious hazards, so qualifications and codes of practice developed by the National Governing Bodies, including the Royal Yachting Association (RYA) and the British Canoe Union (BCU), provide important safeguards for sound and safe participation.

The greatest danger in any water sport is drowning and being immersed in cold water is a major contributing factor in drowning fatalities in this country. Exposure is also a very real hazard.

Additional controls and safety factors

- A Personal Flotation Device (PFD) – such as a buoyancy aid or lifejacket must be worn at all times by group members and leaders. Surfing is an exception to this, see the specific surfing guidelines. The leader must know the appropriate buoyancy aid or life jacket to suit the specific activity, individual and location. All PFDs must comply with appropriate current standards, which are the EN390 series, or BS EN ISO 12402 series. National Governing Body web sites include details of current standards. The buoyancy aid must fit, be in good condition, and preferably tested periodically to ensure it remains fit for purpose.
- Helmets should be worn according to National Governing Body guidelines for the activity, and a local risk assessment.
- All boats and boards should be in good condition, have adequate buoyancy, be suitable for the activity and the right size for the participant. It is the responsibility of the leader to check all equipment before the activity.
- Clothing must be suitable for the conditions and spare clothing should be carried or readily available. Wet suits or dry suits may be appropriate in certain circumstances.
- Footwear should normally be worn for water based activities. Surfing may be an exception.
- First aid equipment and appropriate emergency equipment must be carried or be immediately to hand (in the safety boat) at all times.
- All leaders of water activities must have a current first aid award appropriate to their National Governing Body qualification and to the environment they are working in. (See Health and first aid 3.2)
- Weather and water conditions can make normally safe areas unsafe. Leaders should be aware that at all levels normal water and weather conditions are implied. The leader should also be aware of rips, currents, the particular effects of wind in that area, and relevant local bye laws.
- The leader is always responsible for the whole group.
- The leader should leave details of their activity with a responsible adult on shore, with instructions for action to take if the party is late.
- Leaders need to take common sense precautions for water quality. Using recognised sites will minimise risks. Cuts should be protected with plasters. It is good practice to shower after water based activities. Should illness or 'flu like' symptoms develop immediately or after a few days, participants should consult a doctor. Any incident of Weil's Disease should be reported.
- Individuals taking part in adventurous water based activities should normally be able to swim 50 metres in light clothing. Discretion may be exercised, in accordance with the instructor's training and experience, where special circumstances exist. Water confidence for the proposed activity may be more appropriate than the ability to swim 50 metres. In addition, trained instructors working in a controlled environment may safely introduce some non-swimmers to such activities.

Weather forecasts

For individual and five day forecasts on weather and sea conditions for the South West: Marinecall phone: 09068 500 458 Fax: 09060 100458
or visit: www.marinecall.co.uk

Weathercall - Devon & Cornwall 09068 500 404 or visit: www.weathercall.co.uk Met Office: www.metoffice.gov.uk

Canoeing and kayaking

Activity leader competence: canoeing and kayaking

Hazard level	Group instructor or leader	Code
Very sheltered water - canals, very small lakes, specified sites on slow moving rivers, such as Alder Lake, Tiverton and Tavistock canals.	BCU Level 1 Coach (kayak or canoe)	C4
Sheltered water - flat rivers, lakes close to shore, small bays, enclosed harbours, defined beaches, estuaries with normal wind and weather conditions, such as River Exe in Exeter, Decoy Lake and Brixham Harbour	BCU Level 2 Coach (kayak or canoe)	C3
Moderate water - grade 2 rivers; stretches of coastline with easy landings, moderate surf (less than 1 metre)	BCU Level 3 coach (kayak, canoe, sea or surf as appropriate)	C2
Advanced water - very large lakes, grade 3 rivers; coastal areas with difficult landings and or overfalls and larger surf	BCU Level 4 Coach (kayak , canoe, sea or surf as appropriate)	C1

The BCU is currently revising the Coaching Scheme. New awards may have different limitations and terms of reference. See www.bcu.org.uk for latest details.

BCU Awards are specific to type of water, either inland, sea or surf and to type of boat - either kayak or canoe. Leaders are expected to operate within the terms of reference of their awards.

Recommended staffing ratios

Hazard level	Ratio
Very sheltered inland waters	1:8
Sheltered water	1:8
Moderate water	1:6
Advanced water	1:4

- These ratios represent normal practice for teaching purposes. Circumstances may dictate that lower limits should apply.
- An appropriate technical adviser may allow these ratios to be exceeded.

- The use of suitably qualified assistants can permit larger groups, although over large groups should be avoided.
- Remote locations will need more stringent procedures.

Additional controls and safety factors

- All participants should wear a personal flotation device (PFD) suited to their ability and the location. The PFD should be properly fitting, and tested to ensure it remains fit for purpose
- Helmets may be worn according to BCU guidelines and a local specific risk assessment.

Training opportunities and additional information

- The National Governing Body for all paddlesport activity is the British Canoe Union: www.bcu.org.uk
- Haven Banks Outdoor Education Centre is a recognised Devon County Council BCU centre in Exeter and provides a range of training courses: www.haven-banks.co.uk or phone: 01392 434668

Improvised raft building

Raft building can be a worthwhile, realistic team exercise for groups of any age. Rafts can be made from barrels and planks, windsurf boards, open canoes strapped together, and a variety of other materials. There is no National Governing Body for this activity.

Activity leader competence: improvised raft building

Hazard level	Group instructor or leader
Very sheltered water - canals, very small lakes, specified sites on slow moving rivers, such as Exeter, Tiverton and Tavistock canals.	Life saving or rescue award, with first aid to include CPR. and specific training and approval in raft building at that venue
Sheltered water - flat rivers, lakes close to shore, small bays, enclosed harbours, defined beaches, estuaries in normal wind and weather conditions, such as Alder Lake, Decoy Lake and Brixham Harbour.	National Governing Body award, such as BCU Level 2 Coach, RYA dinghy or windsurf instructor and specific training and approval in raft building.

Additional controls and safety factors

- PFDs, life jackets or buoyancy aids, should be worn by participants on or near the water.
- Helmets should be considered during the building process and when launching.
- Appropriate clothing and footwear should be worn. Hand protection might be considered, for example to avoid splinters, or when pulling on ropes during building.
- Instructors should carry, or have immediate access to, a knife.
- A throw line or other reaching device should be to hand.
- A first aid kit should be available.

Consideration should be given to wind and weather, particularly off shore winds and low water temperatures.

Safety boats

Safety cover should be provided on the basis of a local, specific risk assessment. The principle should be that all the participants can be recovered and returned to the shore before the effects of cold become significant. Powered safety boats should be helmed by a qualified driver, who has a minimum of RYA Level 2 with specific training on raft rescue. It may be appropriate in some circumstances, for example on very sheltered water, for safety cover to be provided from a canoe, windsurf board or non-powered boat. The instructor and safety crew should be practiced in recovering all the rafters from a collapsed raft.

Sailing

Activity leader competence: sailing - dinghies

Hazard level	Group instructor or leader	Code
Assist instructors to teach beginners	RYA Assistant Instructor operating under the direct supervision of an RYA Instructor	K3
Supervise a fleet of single handers or teach in a crew boat	RYA Instructor, inland or coastal as appropriate, with Senior Instructor approval.	K2
Supervise a fleet of training dinghies on any water	RYA Senior Instructor	K1

These arrangements may be amended with the discretion of an appropriately experienced senior instructor.

Recommended staffing ratios

- Staffing ratios will depend on the number of assistants available, the ability of the group, the purpose of the session, the type of dinghy used, the sailing area, the weather and tidal conditions.
- Leaders are expected to exercise their discretion in determining the ratio for each sailing session.

Additional controls and safety factors

- At all levels a safety boat should be on hand, staffed by qualified crew. The minimum qualification is RYA Level 2 National Powerboat Certificate, preferably RYA Safety Boat Award. In either case, the safety boat crew must be experienced and competent to rescue the type of dinghy being used.
- Emergency arrangements should allow for the recovery and immediate start of resuscitation within three minutes of immersion.
- Leaders are expected to operate within the terms of reference of their RYA Award at all times, although not necessarily under the supervision of an RYA recognised teaching establishment.

Training opportunities and additional information:

- The National Governing Body for these activities is the RYA: www.rya.org.uk

Power boat and safety boat handling

Activity leader competence

Hazard level	Group instructor or leader	Code
Drive a powerboat unsupervised on simple water	RYA Level 1 certificate	Q3
Rescue of single handed dinghies, windsurfers and rafts on simple water	RYA Level 2 certificate and experience in rescue of craft in use and endorsed by appropriate technical advisor	Q2
Rescue and supervision of dinghies, windsurfers and rafts in exposed and open water	RYA Safety Boat certificate	Q1
Recreational use of powerboats on simple water, such as fishing, excursions	RYA Level 2 certificate Commercial endorsement may be required Craft must be registered or surveyed or both	
Recreational use of powerboats on open sea, such as fishing, excursions	RYA Level 2 certificate, or equivalent Commercial endorsement and compliance with MCA Codes of Practice may be required Craft may need to hold a Small Commercial Vessel Certificate	

Additional controls and safety factors

- Leaders are expected to operate within the terms of reference of their RYA Award at all times.
- The boat being used must be suitable for purpose and appropriately equipped, including emergency kit, kill cord, first aid and a communication system.
- The number of boats or boards to a safety boat is normally a maximum of 6:1.

Training opportunities and additional information:

- The National Governing Body for these activities is the RYA: www.rya.org.uk
- Leader should be aware of, and comply with, the requirements of the Maritime and Coastguard Agency (MCA) for Small Commercial Vessels. Details are available from the RYA: www.rya.org.uk or the MCA: www.mcga.gov.uk
- The MCA regulations come into force for any commercial activity on the sea, even when using a privately owned boat. Water skiing, banana rides, fishing, and recreational excursions may all fall within the remit of the MCA regulations.

Coastal and off-shore cruising

The National Governing Body for these activities is the RYA: www.rya.org.uk

Introduction

Off-shore cruising places particular demands on participants for skill, fitness and social relationships. The leader must be aware of the nature of problems likely to be encountered, and have the necessary experience to deal with them during the cruise.

Activity leader competence

The qualifications listed are proficiency awards and do not necessarily encompass leadership skills. Party leaders will need to satisfy themselves that the activity will be led by staff who are sufficiently experienced in managing young people or adults.

For centres operating larger craft in a designated sailing area, RYA keelboat qualifications may be appropriate, as an alternative to the RYA Day Skipper.

Hazard level	Group instructor or leader	Code
Skipper a small cruising yacht (20 -35 foot) by day in familiar coastal waters	RYA Day Skipper	S4
Skipper a yacht on coastal cruises by day and by night	RYA Coastal Skipper	S3
Skipper a cruising yacht on any passage which can be completed without the use of astro-navigation	RYA Yachtmaster Off-shore	S2
Skipper a yacht on passages of any length in all parts of the world	RYA Yachtmaster Ocean	S1

Each of these qualifications cover theoretical shore based work and the practical element.

Additional controls and safety factors

- Accident-free sailing depends, in part, on having a boat that is sound, well-equipped and suitable for the activity it is being used for.
- The crew should have enough experience and knowledge to operate in the prevailing conditions.
- Yachts have to comply with Maritime and Coastguard Agency regulations, according to their size and the area of operation. All vessels need either to be operating through an RYA registered school, or hold a Small Commercial Vessel Certificate from the MCA www.mcga.gov.uk

Training opportunities and additional information:

- The National Governing Body for these activities is the RYA: www.rya.org.uk

Snorkelling and sub-aqua

Snorkelling

Snorkelling is often the gateway to the more complex sub-aqua diving activities for young people. However, snorkelling is a challenging activity in its own right.

- The activity is best taught in either a swimming pool or shallow, sheltered open water by teachers who have gained the appropriate award of the British Sub Aqua Club (BSAC) or the Professional Association of Dive Instructors (PADI). In open water leaders must also hold the RLSS Bronze Award or its equivalent.
- Students must be made aware of the need to clear their ears and to avoid exhaustion and hyper ventilation, and the correct use of snorkel equipment.
- Open water snorkelling should take place under the organisation of qualified leaders and instructors with due regard to experience, conditions and safety cover.

Sub-aqua diving

Diving is a specialised activity which, in the UK, relies on thorough training and a high degree of specialised equipment.

The British Sub-Aqua Club (BSAC) provides guidance on the minimum age at which young people may dive and train, and within what limits, including Junior Diving Members aged between 12 and 14. The Professional Association of Dive Instructors (PADI) sets the lower age limit at 10 years old, and offers a 'Bubblemaker' activity for younger divers.

Additional controls and safety factors

- All diving activities should take place with a recognised training facility, either a BSAC branch or school, or a PADI dive school or centre.
- Initial training should be carried out in a swimming pool using a BSAC or PADI training programme with appropriately qualified staff, such as a BSAC Instructor or Dive Leader.
- Open water diving should be carried out under the overall organisation and control of an instructor with a minimum of BSAC Club Instructor qualification or PADI equivalent.
- The ratio of instructor to student in the water should be according to the relevant BSAC or PADI guidelines.
- Open water diving needs to be carried out with due regard to careful progression of the pupil's experience and the prevailing conditions and depth.

Training opportunities and additional information

- The National Governing Body for this activity is the British Sub Aqua Club (BSAC) www.bsac.com
- BSAC also qualifies leaders as snorkelling instructors and has a dedicated snorkelling section: www.bsacsnorkelling.co.uk
- The Professional Association of Diving Instructors (PADI) is a worldwide organisation that offers training courses and supervised diving to an acceptable standard: www.padi.com

Surfing

Activity leader competence: surfing - using Malibu boards or body boards

Hazard level	Group instructor or leader	Code
Approved lifeguard patrolled beaches with lifeguard present - body boards only in defined limited area	RLSS Bronze Medallion or equivalent	
Approved lifeguard patrolled beaches – Malibu boards	BSA Level 1 Coach	N3
Approved beaches– Malibu boards	BSA Level 1 Coach with additional experience and ability	N2
Open Beaches– Malibu boards	BSA Level 1 Coach with additional experience and ability	N1

Recommended staffing ratios

- The British Surfing Association (BSA) recommends a ratio of no more than 10 surfers to one BSA Level 1 instructor. For body boards, where the leader is qualified at RLSS Bronze Medallion only, the ratio is 1:8. The use of a competent assistant may increase this number to 1:10 at the discretion of the leader.

Additional controls and safety factors

- Surfers should be made aware of, and follow, the BSA Code of Conduct.
- The leader must be fully aware of the prevailing local conditions: surf, tide, wind and weather and be fully confident of rescuing any member of the group.
- The leader must consult the lifeguard patrol wherever possible and follow their advice.
- The leader must be in control of the whole group, including those out of the water.
- All surfboards should be in good condition and have ankle straps; body boards should have wrist straps. It is recommended that soft skinned Malibu boards are used by beginners.
- Members of the group should wear wetsuits and swimming costumes or other clothing appropriate to the water temperature and weather conditions.
- An area of operation must be designated, and the leader must know the commonly used signals of distress and recall.
- All members of the group must be competent swimmers in the light of the conditions.
- When beginners are being introduced to the activity, consideration must be given to pairing a participant with a shore based observer.

Training opportunities and additional information

- The National Governing Body for surfing is the British Surfing Association: www.britsurf.co.uk
- The BSA runs an accreditation system for surf schools, which provides the basis for staff wishing to instruct or teach surfing.

- Holders of the BSA Level 1 Coach Award also need to hold a life saving award acceptable to the BSA.

Water skiing and associated activities

- Water skiing and similar activities, such as banana rides and wake boards, should only be offered to groups through registered operators, and **not** on private boats.
- The National Governing Body for water skiing is the British Water Ski Federation (BWSF): www.britishwaterski.org
- The BWSF runs an approval system for water ski schools, and has an established Ski Boat Driver Award (SBDA).
- Banana rides or similar are often offered as an additional activity by sailing schools. The school should have in place minimum standards of competence for the driver, such as the SBDA or RYA level 2 certificate, backed up by additional training. Ski boats should always have a second person, or 'spotter' to watch the skier or riders and assist the driver.

Jet skiing (personal watercraft)

- This activity should only be offered to groups through registered organisations, and **not** on private craft.
- The National Governing Body for personal watercraft is the RYA. The RYA register and approve centres and schools, and have an award system for instructors: www.rya.org.uk

Windsurfing

The National Governing Body for windsurfing is the RYA: www.rya.org.uk

Activity leader competence

Hazard level	Group instructor or leader	Code
Very restricted waters with RYA Instructor on site	RYA Start Windsurfing Award and DCC Leadership Assessment	A4
Simple inland water or very sheltered tidal water sites with RYA Instructor on site	RYA Intermediate (non-planing) Award and Devon CC Leadership Assessment Or RYA Assistant Instructor Inland	A3
Inland	RYA Start Windsurfing Instructor	A2
Sea or tidal waters	RYA Start Windsurfing Instructor (Open Sea)	A2

The RYA Instructor awards are issued as either Inland or Open Sea, and leaders should only operate within the terms of reference of their award. Holders of higher level awards must work within the remit of their award.

Recommended staffing ratios

- The minimum staff ratio is normally 1 leader to 6 group members. At instructor level the leader should use their discretion to judge when this ratio can safely be exceeded.

Additional controls and safety factors

- At all levels a safety boat should be on hand, staffed by qualified crew. The minimum qualification is the RYA Level 2 National Powerboat Certificate, preferably the RYA Safety Boat Award. The safety boat crew must be experienced and competent to rescue windsurfers. On sheltered water sites it may be acceptable for the leader to provide rescue cover from a canoe, or their own board. The leader should exercise careful judgement in deciding what rescue cover to provide, taking into account the wind and weather, location and the ability of the group. Emergency arrangements should allow for the recovery and immediate start of resuscitation within three minutes of immersion.
- The leader must show knowledge and understanding of the RYA method of teaching. Recall signals must be clear and known by all. The sailing area must be clearly defined. The leader must know the harbour, estuary or river throughout all stages of the tide.

Training opportunities and additional information

- The National Governing Body for these activities is the RYA: www.rya.org.uk

4.8 Activities in the air

Included in this section are gliding, hang gliding, flying (except commercial flying), parachuting and other air based activities. These fall within Category C, which means that details must be notified to the adviser for outdoor education.

The council's insurers do not provide insurance cover for air borne activities. For these reasons the council will need party leaders to ensure the provider of the activity has public liability insurance and that participants consider their own needs in terms of accident insurance.

4.9 Duke of Edinburgh's Award (DoE)

Devon County Council and Torbay Council are the respective operating authorities for the Duke of Edinburgh's Award. These guidelines have been drawn up for anyone managing potentially hazardous expeditions or explorations, practices or training under Award scheme arrangements.

Leaders must be appropriately qualified and have sound knowledge of the Award scheme. Assistant leaders, not in overall charge of an activity, may not need to be registered as long as they work under the direction of a leader in charge who is present and appropriately qualified. This would also depend on the size of the party. The supervisor is the individual responsible for safety on any expedition.

Also see the sections on mountain and moorland leadership and camping.

Summer Mountain Walking Leader Award

Enables trainers, assessors and supervisors to manage summer expeditions of any duration anywhere in the United Kingdom and expeditions on South-West moorland in winter.

Walking Group Leaders Award (MLTE)

Enables trainers, assessors and supervisors to manage summer expeditions on moorland, of any duration, and day walks on moorland in summer or winter, provided

the candidate has been assessed in the skills of camping in remote moorland locations (for example away from farm sites). This is an appropriate minimum qualification for Gold Award supervisors.

Winter Moorland Walking Leader and Summer Moorland Camping Leader

Enables trainers, assessors and supervisors to manage summer expeditions on moorland, of any duration, and day walks on moorland in summer or winter. This is also the appropriate minimum qualification for Gold Award supervisors.

Summer Moorland Camping Leader

Enables trainers, assessors and supervisors to manage overnight moorland expeditions in summer conditions and day moorland walks in summer conditions.

Summer Moorland Walking Leader

Enables moorland training day walks in summer conditions.

At bronze and silver level normal country should be used for ventures. To manage expeditions in this environment trainers, assessors and supervisors need to have completed a Coastal and Countryside Leadership award and the camping endorsement or its equivalent, or be registered as a Summer Moorland Camping Leader or higher. For training day walks in normal country no qualification is required.

At gold level, assessment may only be carried out by Wild Country Panel Assessors.

Approval of expeditions

The Evolve web based visits management system is being adapted for DoE approval.

See www.devonvisits.org.uk

A red notification form should be used for all bronze and silver ventures. Details are available from:

Devon: The County Award Office

Torbay: www.deseducation.org/outdooreducation

A **green** notification form should be used if ventures are planned in a Wild Country Panel area, and information forwarded at least six weeks beforehand with a record of the risk assessment. For Devon DoE programmes a copy should also be sent to the DoE Award Office in Moretonhampstead.

A **blue** notification form should be used for overseas ventures and forwarded at least three months in advance for approval, or use a current Other Adventurous Project (OAP) form, if the venture is considered to be an OAP.

Water borne activities (DoE)

Instructors, supervisors or assessors should have the required level of qualification described in the section on water based activities.

For gold water borne expeditions, the green notification form should be sent at least six weeks before the activity. For bronze and silver level use the red form.

Winter expeditions

All ventures in the closed season, 1 November to 31 March inclusive, must be approved and particular care needs to be taken. If the winter venture goes into designated Wild Country areas, the Wild Country Panel must also give their approval for that group to use that particular area.

Other hazardous activities

For all other hazardous activities which take place under the Skill, Service and Physical Recreation Section of the Award Scheme leaders should follow the guidelines in the appropriate section in this booklet or refer to:

Devon: The County Award Office

Torbay: The adviser for outdoor education.

Approval is needed for DoE residential experience and for visits abroad.

For more information about DoE contact:

- The Duke of Edinburgh's Award Officer, 2 Fore Street, Moretonhampstead, Newton Abbot, Devon TQ13 8LL. Phone: 01647 440983 Email: [**doeaward@devon.gov.uk**](mailto:doeaward@devon.gov.uk)

Form SOE1: Off-site activities proposal form

Once the Evolve system is introduced in your establishment you will no longer need to use this form.

This form is to be completed by party leaders planning activities in Category B or C (see Section 2.5) which have been provisionally approved by the head, manager of the establishment or the educational visits co-ordinator. The form should then be sent with a copy of the risk assessment to:

Adviser for Outdoor Education, Devon Education Services,
Great Moor House, Bittern Road, Sowton, Exeter EX2 7NL
Phone: 01392 384846 Fax: 01392 384880 Email: outdoor.education@devon.gov.uk

Form SOE3: Parental consent for off-site activities

Dear parent or guardian

You have already received details about our forthcoming visit or activity. Please complete and return this form giving your consent for your child to take part in this activity.

School, college or establishment

Visit or activity

Dates and times

Name of child

Date of birth

Special details - any information about your child's health which may need special attention, but does not prevent them from taking part should be noted below. (For example; any allergies, any medication needed and the dosage, travel sickness, diabetes, asthma or epilepsy?)

Has your child had any relevant recent illness?

Does your child have any specific dietary requirements?

Do you have any additional comments?

Swimming ability (for water based activities)

Is your child able to swim 50 metres? YES / NO

Is your child water confident for the proposed activity? YES / NO

1. I would like my child to take part in this visit or activity and having read the information provided agree to him/her taking part in the activities described.
2. I consent to any emergency medical treatment required by my child during the course of the visit.
3. I confirm that my child is in good health and I consider him/her fit to participate.

Form SOE4: Summary of information about young people and adults participating in an off-site activity

Forename	Surname	Date of birth	Address	Next of kin	Contact phone number	Relevant medical information

Form SOE5: Provider standards: use of commercial, charitable and private facilities

To be completed by providers of outdoor education, visits and off-site activities to schools and education establishments.

Name of provider organisation:

The provider named above is asked to give careful consideration to the statements below and sign in the space at the end of the form that the standard of service provided will meet the conditions listed. Please tick all specifications you meet. Mark a cross for any you cannot meet. Write N/A against any specifications which do not apply to your provision.

Section A should be completed for all visits.

Section B (adventure activities) should be completed if applicable.

Section A – all providers

1. The provider complies with relevant health and safety regulations, including the Health and Safety at Work Act 1974, and has a health and safety policy and recorded risk assessments which are available for inspection.	
2. Accident and emergency procedures are maintained and records are available for inspection.	
3. The staff have the experience, competence and professionalism to work with the age range and abilities of prospective groups.	
4. There are adequate and regular opportunities for the party leader to liaise with the provider and designated staff.	
5. The centre has a Code of Conduct, which can be provided in advance of any booking and to which visiting groups should adhere.	
6. All reasonable checks, including CRB checks, are made for staff who have unsupervised access to young people for relevant criminal history and suitability for work with young people.	
7. There are adequate and regular opportunities for liaison between visiting staff and the provider's staff and there is sufficient flexibility to make changes to the programme if necessary and the reasons for such changes will be made known to visiting staff.	
8. The provider has public liability insurance for at least £5 million.	
9. The provider will take all reasonable steps to allow inclusion and participation of any young people who have special needs or have a disability, following a risk assessment process, in line with the Special Educational Needs and Disability Act 2001 and Disability Discrimination Act 2005.	
10. The provider encourages responsible attitudes to the environment as an integral part of the programme.	
11. All vehicles are roadworthy and meet statutory requirements. Drivers are PCV qualified or operate with a small bus permit and local minibuss driving assessment.	
12. A fire risk assessment has been completed and meets the requirements of the Regulatory Reform (Fire Safety) Order 2005.	
13. Security arrangements have been assessed and reasonable steps taken to prevent unauthorised people entering the accommodation.	
14. Separate male and female sleeping accommodation and washing facilities are provided and staff accommodation is suitably located to ensure adequate supervision.	

Section B – Providers of outdoor and adventurous activities

15. The provider meets the requirements of the Adventure Activities Licensing Service (AALS).	
<p>For AALS licensable activities the specifications in this section may be checked as part of an AALS inspection. However, providers registered with AALS are also asked to consider the statements below for any activities or aspects of their provision not covered by the licence.</p>	
16. The minimum ratios of staff to young people for the activities conform to those recommended by the appropriate National Governing Body or, in the absence of this, the provider's Code of Practice and are informed by a risk assessment.	
17. The provider operates a policy for staff recruitment, induction and training which ensures that all staff with a responsibility for participants are competent to undertake their duties.	
18. The provider maintains a written code of practice for each activity which is consistent with relevant National Governing Body guidelines or, in their absence, recognised national standards.	
19. Staff competencies are confirmed by the appropriate National Governing Body qualification for the activity to be undertaken, or staff have had their competencies confirmed by an appropriately experienced and qualified technical adviser.	
20. Visiting groups will have access to appropriate first aid. Centre based staff are practised and competent to respond to accidents and incidents.	
21. There is a clear definition of responsibilities between providers and visiting staff regarding supervision and welfare of participants.	
22. All equipment used for activities is suited to the task and adequately maintained and monitored in accordance with current good practice.	

If any of the above specifications cannot be met or are not applicable, please give details:

Please give details of any accreditation with AALS, national governing bodies or tourist boards.

Thank you for completing this form. Please return it to:

This is a standardised form adopted by the South-West Outdoor Education Advisers' Panel for use by local authorities and schools. (July 2005, amended December 2006: Sections 9 and 12)

Form SOE6

Establishment:

Activity or environment:

Educational objectives:

Completed by:

Assessment date:

Date reviewed:

1. Hazard List significant hazards which may result in serious harm or affect several people.	2. Who might be harmed? List groups of people who are especially at risk from the significant hazards identified.	3. Is the risk adequately controlled? List existing controls or note where the information may be found (such as information, instruction training, systems or procedures).	4. What further action is needed to control the risk? List the risks which are not adequately controlled and proposed action where it is reasonably practicable to do more.

Reminder

- See the policy and guidance in *Outdoor Education, Visits and Off-Site Activities*.
- Generic risk assessments may be seen at: www.deseducation.org/outdooreducation Details from the generic risk assessment do not need to be repeated in your activity specific assessment.
- DCSF has produced *A Handbook for Group Leaders and Group Safety at Water Margins*. These short reminders of good practice are available at: www.teachernet.gov.uk/visits

In your risk assessment have you considered and made reference to:

- travel and transport arrangements?
- the needs of the whole group, including young people with special needs, a significant medical condition or disability?
- how you know that an external provider you are using is suitable?
- the experience or expertise of members of staff?
- accommodation arrangements, evening and overnight supervision?
- the places you are visiting? Have you been able to carry out a pre-visit? If not, how do you know what to expect?
- your Plan B, if conditions require a change from your original plan, or in an emergency?

On going risk assessment:

- Apply the control measures.
- Monitor how effective they are.
- Change, adapt and revise as circumstances and the needs of the group require, such as for weather conditions and illness.

Once measures are in place to control any risks, is the remaining risk acceptable?
